Books

Darwinism Under the Microscope probes

the exciting "Darwinism vs. Design" debate that is making headlines. It lays a scientific foundation for "divine design" and equips the reader to discuss the topic intelligently...even with professors! *Darwinism Under the Microscope* Jessica Kingsley Publishers

The role of museums in enhancing well-being and improving health through social intervention is one of the foremost topics of importance in the museums sector today. With an aging population and emerging policies on the social responsibilities of museums, the sector is facing an unprecedented challenge in how to develop services to meet the needs of its communities in a more holistic and inclusive way. This book sets the scene for the future of museums where the health and well-being of

communities is top of the agenda. The authors draw together existing research and best practice in the area of museum interventions in health and social care and offer a detailed overview of the multifarious outcomes of such interactions, including benefits and challenges. This timely book will be essential reading for museum professionals, particularly those involved in access and education, students of museums and heritage studies, as well as practitioners of arts in health, art therapists, care and community workers.

Bones of Contention Charisma Media
This is the first book to explore and evaluate the potential of museum and gallery spaces and partnerships for art therapy. Showcasing approaches by well-known art therapists, the edited

collection contains descriptions of, and reflections on, art therapy in museums and galleries around the globe. Case studies encompass a broad range of client groups, including people with dementia, refugees and clients recovering from substance abuse, exploring the therapeutic skills required to work in these settings. The collection also establishes the context for art therapy in museums and galleries through reviewing key literature and engaging with the latest research, to consider wider perspectives on how these spaces inform therapeutic practice. Offering a comprehensive look at ways in which these locations enable novel and creative therapeutic work, this is an essential book for art therapists, arts and health practitioners and

museum professionals.

Art Therapy in Museums and Galleries
McGraw-Hill/Glencoe

The modernization of public administration is a recurring theme on the political and public agenda in many countries. Modernization presupposes innovation. However, is an innovative public administration a contradiction in terminis? If we look at the practice of public administration, and evaluate – from an evolutionary perspective – how public administration has transformed itself during the last 40 years, we actually see a variety of radical and incremental changes. Hence, innovation does take place. This book clearly demonstrates how public administration organizations try to adapt to changing circumstances in their environment in

order to secure their legitimacy. At the same time we see that public administration tries to respond and anticipate to new technological developments as well as to make use of them. In many countries e-government has become the symbol of the way in which ICT has penetrated in the nerves of ministries, local and regional government and all kinds of agencies. In this publication, a number of case studies have been presented in which different kind of ICT-driven innovations have been described and analyzed.

There is growing interest internationally in the contributions which the creative arts can make to wellbeing and health in both healthcare and community settings. A timely addition to the field, this book discusses the role the creative arts have in addressing some of the most pressing public health challenges faced today. Providing an evidence-base and recommendations for a wide audience, this is an essential resource for anyone involved with this increasingly important component of public health practice.

Information and Communication Technology and Public Innovation Oxford University Press, USA

Seeking to disprove the theory of human evolution, the author examines the fossils of the so-called "ape men."

Oxford Textbook of Creative Arts, Health, and Wellbeing Routledge

Everyone's heard of it. Many believe it. Is there a 'gap in time' between the first two verses in Genesis? Does this alleged gap really represent a vast amount of time? Weston Fields' classic treatment of this subject is now being published by Master Books, and promoted by such important organisations as Answers in Genesis. In this book, Fields makes a detailed study of the gap theory, paying particular attention to the Hebrew of Genesis. His conclusion -- that this theory is not a reasonable compromise with modern evolutionary theory, but a

dangerous diversion from biblical truth -- helps readers who struggle with the question of the time taken during the creation week. Was it really six days? Can Christians find a workable solution to the debate about creation and time?

An important book. Features: A presentation of a variety of views espoused by Christians of all denominations; A professional, scholarly look that can be easily understood by laymen; A fascinating study of the original Hebrew text.
