NCELTR Many cultures accept that a person may die and then come back to life in another form, but Westerners have traditionally rejected the idea. Recently, however, surveys conducted in Europe indicate a substantial increase in the number of Europeans who believe in reincarnation, and numerous claims of reincarnation have been reported. This book examines	particular cases in Europe that are suggestive of reincarnation. The first section provides a brief history of the belief in reincarnation among Europeans. The second section considers eight cases from the first third of the twentieth century that were not independently investigated, but were reported and sometimes published by the persons concerned. The third	section covers 32 cases from the second half of the twentieth century that were investigated by the author. Many of these cases involved either children who exhibited unusual behavior attributed to a previous life, or adults who experienced recurrent or vivid dreams attributed to a previous life. In the fourth section, the author compares European cases suggestive of reincarnation with those of

prvega mednarodneg a posvetovanja študijske skupine Mednarodneg a sveta za tradicijsko glasbo (ICTM), ki je potekalo v Ljubljani od 25. do 30. junija 2000. Prispevki so razdeljeni po tematskih sklopih: najprej sta predstavljena raziskovanje manjšin in študijska skupina Glasba in manjšine, sledijo teme, ki obravnavajo različne slovenske manjšine zunaj

Slovenije in manjšine v slovenskem prostoru, zgodovinske teme, ki obravnavajo manjšine v preteklosti, ter raziskave o Romih in drugi prispevki, ki obravnavajo različne etnične in narodnostne manjšine. Konferenca je potekala v angleškem jeziku, zato so tudi referati v angleščini, povzetki pa prevedeni v slovenščino. Zbornik vsebuje tudi imensko in krajevno kazalo ter CD-ploščo z 32

zvočnimi primeri. *A Study of Incest in Central Sri Lanka* World Bank Publications The sixth edition of an educational handbook revised and updated in 1992 that has become a standard text for training teachers in the health sciences. Unorthodox in its approach, the book challenges teachers to increase their skills so as to make learning easier for students. To this end,

readers are given a task-oriented exercise in self-learning that can help them rethink attitudes, reorient teaching objectives, and then master the appropriate skills. The importance of producing graduates who are able to respond to community and individual health needs is repeatedly emphasized. The book features five main chapters covering educational objectives, evaluation

planning, program construction, test and measurement techniques, and the organization of an educational workshop. Within each chapter, theoretical information is presented and followed wherever appropriate by exercise sheets. Such a format makes it possible for the reader to skip and select, test, and choose according to his individual interests. Though most practical

examples pertain to the medical and nursing professions, the handbook has also enjoyed wide use in teacher training for the dentistry, pharmacy, and sanitary engineering professions. Glasba in manjšine UCL Press Focuses on the changing context of education; the changing nature of self-managing schools; their own leadership and management skills within this environment.

*The Challenge of Youth Employment in Sri Lanka* Cambridge Scholars Publishing How do the benefits of higher education compare with its costs, and how does this comparison vary across individuals and institutions? These questions are fundamental to quantifying the productivity of the education sector. The studies in *Productivity in Higher Education* use rich and novel

administrative data, modern econometric methods, and careful institutional analysis to explore productivity issues. The authors examine the returns to undergraduate education, differences in costs by major, the productivity of for-profit schools, the productivity of various types of faculty and of outcomes, the effects of online education on the higher education market, and the ways in

which the productivity of different institutions responds to market forces. The analyses recognize five key challenges to assessing productivity in higher education: the potential for multiple student outcomes in terms of skills, earnings, invention, and employment; the fact that colleges and universities are “multiproduct” firms that conduct varied activities across many

domains; the fact that students select which school to attend based in part on their aptitude; the difficulty of attributing outcomes to individual institutions when students attend more than one; and the possibility that some of the benefits of higher education may arise from the system as a whole rather than from a single institution. The findings and the approaches illustrated can

facilitate decision-making processes in higher education. **Vampire Kisses 9: Immortal Hearts** SAGE Publications India This excellent textbook introduces the student to the field of sociology, illustrating how sociology is connected to and fundamental to effective social work practice. Each chapter applies theory to practice and is uniquely co-

written by a sociologist, social worker and service user. A wide range of topics and subjects relevant to social work are covered, including: - Gender -Class -Ethnicity and race -Ageing - Health - Intimacies - Social exclusion - Crime and deviance - Communities - Disability The book comes with access to an exciting companion website offering the reader downloads, web links,

powerpoint slides and case studies. Every chapter of the book further includes further case studies, along with lots of clear definitions of terms, and reflection points, making this book the essential introductory text for all social work students. Developments and Advances in Defense and Security World Bank Publications Language endangerment has been the focus of much attention and

as a result, a wide range of people are working to revitalize and maintain local languages. This book serves as a general reference guide to language revitalization, written not only for linguists and anthropologists, but also for language activists and community members who believe they should ensure the future use of their languages, despite their predicted loss. Drawing extensively on

case studies, it sets out the necessary background and highlights central issues such as literacy, policy decisions, and allocation of resources. Its primary goal is to provide the essential tools for a successful language revitalization program, such as setting and achieving realistic goals, and anticipating and resolving common obstacles. Clearly written and informative, *Saving Languages* will

be an invaluable resource for all those interested in the fate of small language communities around the globe. *A Strategy for Capturing the Power of Diversity* John Wiley & Sons  
 Nowadays, society is constantly changing, and new ways of life are being developed by due to nonstop technological advancements . This generates changes in family, schools, the

media, etc. New technologies are creating virtual environments to manage learning and academic achievement, and this is a new challenge to approach formal and informal education. In the last few decades, teachers, families, and educational administrators had very well-defined fields of action and roles to play. Now, these roles are disfigured, and influences from all agents are

arguable and more difficult to face. At this current stage, problems sometimes appear that require different forms of intervention. Some of the problems are violence towards people; child abuse; drug abuse at increasingly early ages; integration problems due to immigration; dropping out of school; and typical problems related to student development, personality,

disabilities, social and psychological maladjustment, teenagers socioaffective relationships, etc. Research on school success and failure has a long history, but there is still no agreement concerning the prevalence of these variables to explain academic achievement, the relationship between those variables, and which other variables modulate their level of impact. For

many years, cognitive psychology has emphasized cognitive function as the most relevant for learning in school. However, recent studies highlight the importance of motivational and affective functions in building consistent models to explain learning and academic achievement. This change of perspective, from the classical cognitive model to a self-regulated

learning model, has implied a new orientation in the research of the factors involved in school success and failure. Self-regulated learning models try to integrate students cognitive, socioaffective, and behavioral aspects. These models describe the different components involved in successful learning at all school stages, explaining reciprocal relationships between those components

and directly relating learning to personal achievement, motivation, volition, and emotions. With this new paradigm, students not only contribute to strengthening their intelligence, but also their motivational and emotional qualities, all related to achieving personal balance. This book presents studies, ideas, and recommendations to shed light on the complex educational

world. Education has limits and difficulties, but it is also the only instrument that can develop students potential into personal success.

### **Saving Languages**

John Wiley & Sons

The peoples of Sri Lanka have participated in far-flung trading networks, religious formations, and Asian and European empires for millennia. This interdisciplinary volume sets out to draw Sri

Lanka into the field of Asian and Global History by showing how the latest wave of scholarship has explored the island as a 'crossroads', a place defined by its openness to movement across the Indian Ocean. Experts in the history, archaeology, literature and art of the island from c.500 BCE to c.1850 CE use Lankan material to explore a number of pressing scholarly debates. They

address these matters from their varied disciplinary perspectives and diverse array of sources, critically assessing concepts such as ethnicity, cosmopolitanism and localisation, and elucidating the subtle ways in which the foreign may be resisted and embraced at the same time. The individual chapters, and the volume as a whole, are a welcome addition to the history and

historiography of Sri Lanka, as well as studies of the Indian Ocean region, kingship, colonialism, imperialism, and early modernity.

**School Leadership for the 21st Century**

SAGE

A country's education system plays a pivotal role in promoting economic growth and shared prosperity. Sri Lanka has enjoyed high school-attainment and enrollment rates for

several decades. However, it still faces major challenges in the education sector, and these challenges undermine the country's inclusive growth goal and its ambition to become a competitive upper-middle-income country. The authors of Sri Lanka Education Sector Assessment: Achievements, Challenges, and Policy Options offer a thorough review of Sri Lanka's

education sector—from early childhood education through higher education. With this book, they attempt to answer three questions: • How is Sri Lanka's education system performing, especially with respect to participation rates, learning outcomes, and labor market outcomes? • How can the country address the challenges at each stage of the education process,

taking into account both country and international experience and also best practices? • Which policy actions should Sri Lanka make a priority for the short and medium term? The authors identify the most critical constraints on performance and present strategic priorities and policy options to address them. To attain inclusive growth and become globally competitive, Sri Lanka

needs to embark on integrated reforms across all levels of education. These reforms must address both short-term skill shortages and long-term productivity. As Sri Lanka moves up the development ladder, the priorities of primary, secondary, and postsecondary education must be aligned to meet the increasingly complex education and skill requirements. **Dying Words**  
Nuffield Chemistry  
Sri Lanka has long been regarded as a model of a successful welfare state in a low-income setting, yet it has not succeeded in creating a sufficient

number of good jobs for the increasing number of young people. Hence, young Sri Lankans perceive their country as an unjust and unequal society, in which mainstream institutions have failed to address inequalities in the distribution of resources, as well as of benefits deriving from economic growth. Against this background, 'The Challenge of Youth Employment

in Sri Lanka' aims to identify ways to improve the opportunities available to new job market entrants by addressing existing inequalities and to help young people more fully realize their potentials. Drawing from original research and a review of existing studies, the authors use the 4Es conceptual framework to analyze four key aspects of labor markets employment creation,

employability, entrepreneurs hip, and equal opportunity identifying main issues and results, current trends, and possible new approaches.

Who Offset Publication  
Immortal Hearts concludes Ellen Schreiber's romantic, exciting Vampire Kisses series. In Immortal Hearts from the popular Vampire Kisses series by Ellen Schreiber, Alexander's little sister Athena "Stormy" Sterling comes to Dullsville, stirring up the immortal world. Her visit gives teen goth-girl Raven a

clearer picture of what life as a member of Alexander's vampire family would be like. Nothing she sees lessens her desire to become a vampire. She adores Alexander. She's sure spending every night with him and sleeping in his arms in his coffin every day would be the perfect life. But she hasn't been able to convince her vampire love that he should turn her. At least not yet... Fans won't

want to miss the last chapter in Raven and Alexander's love story. *Fifty Key Thinkers on Development* Unesco Sports science studies in detail the response of human body to diverse exten of physical activity. Sports management has many branches such as marketing, event management, sports information management and facility management. The sports

industry is a thriving economic sector that is consumer-driven and hence, dependent on the performance of athletes and related personnel. This book brings forth some of the most innovative concepts and elucidates the unexplored aspects of sports science and management. The objective of this text is to give a general view of the different areas of this

discipline. It strives to provide a fair idea about this field and to help develop a better understanding of the latest advances within sports science and management. Coherent flow of topics, student-friendly language and extensive use of examples make this book an invaluable source of knowledge. *Sociology for Social Work* Kogan Page Publishers Applied ethnomusicolo

gy is an approach guided by principles of social responsibility, which extends the usual academic goal of broadening and deepening knowledge and understanding toward solving concrete problems and toward working both inside and beyond typical academic contexts (International Council for Traditional Music 2007). This edited volume is based on the first

symposium of the ICTM's Study Group on Applied Ethnomusicology in Ljubljana, Slovenia in 2008 that brought together more than thirty specialists from sixteen countries worldwide. It contains a Preface, an extensive Introduction, and twelve selected peer-reviewed articles by authors from Australia, Austria, Canada, Germany, Slovenia, Serbia, South Africa, the

United Kingdom, and the United States of America, divided into four thematic groups. These groups encompass: diverse perspectives on the growing field of applied ethnomusicology in various geographical and problem-solving contexts; research and teaching-related connotations; the potential in contributing to sustainable music cultures; and the use of music in conflict resolution situations. The edited volume *Applied Ethnomusicology: Historical and Contemporary Approaches* brings together previously dispersed knowledge and perspectives, and offers new insights to various disciplines within the humanities and social sciences. Rooted in diverse scholarly traditions, it addresses a variety of challenges in today's world and aims to benefit the quality of human existence.
