As the city of Minneapolis prepares for a visit from President William McKinley, someone else prepares for murder. On the day before the visit, a union activist is found hanged, naked, outside a ruined mansion. A placard around his neck reads "THE SECRET ALLIANCE HAS SPOKEN." Who is the alliance? What does it want? How was the victim involved with the city's corrupt mayor? And why did he possess a photograph of a prominent citizen in a compromising position? Shadwell Rafferty searches for answers, encountering bribery, corruption, union organizers, anarchists, and conspiracy, putting himself in danger. But as luck would have it, his old friends Sherlock Holmes and Dr. John H. Watson are on their way. In this fourth installment of Larry Millett's Minnesota Mystery series, Shadwell Rafferty commands center stage in a brand-new city. Packed with Millett's signature historical and architectural detail, this book is deviously delightful.

JEREMY CLARKSON'S LATEST - AND MOST OUTRAGEOUS - TAKE ON THE WORLD CLARKSON'S BACK - AND THIS TIME HE'S PUTTING HIS FOOT DOWN From his first job as a travelling sales rep selling Paddington Bears to his latest wheeze as a gentleman farmer, Jeremy Clarkson's love of cars has just about kept him out of trouble. But in a persistently infuriating world, sometimes you have to race full-throttle at the speed-bumps. Because there's still plenty to get cross about, including: • Why nothing good ever came out of a meeting • Muesli's unmentionable side effects • Navigating London when every single road is being dug up at once • People who read online reviews of dishwashers • ****ing driverless cars Buckle up for a bumpy ride - you're holding the only book in history to require seatbelts . . . Praise for Jeremy Clarkson: Brilliant . . . Laugh-out-loud' Daily Telegraph 'Outrageously funny . . . Will have you in stitches' Time Out 'Very funny . . . Electrification is an evolving paradigm shift in the transportation industry toward more efficient, higher performance, safer, smarter, and more reliable vehicles. There is in fact a clear trend to move from internal combustion engines (ICEs) to more integrated electrified powertrains. Providing a detailed overview of this growing area, *Advanced Electric Drive Vehicles* begins with an introduction to the automotive industry, an explanation of the need for electrification, and a presentation of the fundamentals of conventional vehicles and ICEs. It then proceeds to address the major components of electrified vehicles—i.e., power electronic converters, electric machines, electric motor controllers, and energy storage systems. This comprehensive work: Covers more electric vehicles (MEVs), hybrid electric vehicles (HEVs), plug-in hybrid electric vehicles (PHEVs), range-extended electric vehicles (REEVs), and all-electric vehicles (EVs) including battery electric vehicles (BEVs) and fuel cell vehicles (FCVs) Describes the electrification technologies applied to nonpropulsion loads, such as power steering and air-conditioning systems Discusses hybrid battery/ultra-capacitor energy storage systems, as well as 48-V electrification and belt-driven starter generator systems Considers vehicle-to-grid (V2G) interface and electrical infrastructure issues, energy management, and optimization in advanced electric drive vehicles Contains numerous illustrations, practical examples,

case studies, and challenging questions and problems throughout to ensure a solid understanding of key concepts and applications *Advanced Electric Drive Vehicles* makes an ideal textbook for senior-level undergraduate or graduate engineering courses and a user-friendly reference for researchers, engineers, managers, and other professionals interested in transportation electrification.

An insight into the design, construction and operation of the feared World War 2 German Type VIIC U-boat. The German Type VIIC U-boat, scourge of Allied shipping convoys during the Second World War, was the workhorse of the German U-boat force. With some 568 Type VIIs in use between 1940 and 1945 it was a potent fighting vessel that could hunt for long periods in the far reaches of the western and southern Atlantic. Centerpiece of the Haynes U-boat Owners' Workshop Manual is the sole surviving example of a Type VIIC U-boat, U-995, which is on display at the German Naval Memorial near Kiel in northern Germany.

Skylab has a fascination among space professionals and enthusiasts alike and a book on the engineering and design of this space station has been argued for in blogs and chat rooms for many years. No other book has yet been published which describes the technical, design and engineering details of how Skylab was built and operated. There have been several biographies by astronauts relating their experiences on Skylab missions, but no comparable book on the technical aspects of this extraordinary programme.
