Marketing: Real People, Real Choices brings you and your students into the world of marketing through the use of real companies and the real-life marketing issues that they have faced in recent times. The authors explain core concepts and theories in Marketing, while allowing the reader to search for the information and then apply it to their own experiences as a consumer, so that they can develop a deeper understanding of how marketing is used every day of the week, in every country of the world. The new third edition is enhanced by a strong focus on Value Creation and deeper coverage of modern marketing communications practices.

Buying, Having, Being Infinite Ideas

Consumers no longer simply "buy stuff" -- they forge their entire identities around a carefully selected set of brands. Consequently, they must become active participants in the development and marketing of products. This book details the factors that contribute to this continuing revolution, and reveals how companies can leverage their customers as an integral part of their branding and marketing strategies. It contains cutting-edge content, written in a lively, conversational style.

Digital Disruption in Marketing and Communications Prentice Hall

Consumer Behavior Buying, Having, and Being Pearson

Debates on Media & Communication studies Pearson

This book sets out the new frontier of marketing and communication through real case histories. Companies must rethink their traditional approaches to successfully face the upcoming challenges. They must learn how to innovate and change things when they go well. New emerging technologies such as AI and IoT are the new frontiers of the digital transformation that are radically changing the way consumers and companies communicate and engage with each other. Marketing makes a company a change-maker, while communications tell the story to engage customers and stakeholders. The book introduces brand positioning (to match brand values and consumers' attributes), and brand as human being (to raise trust, loyalty and engagement among customers and stakeholders), through Enel X and its partnership with Formula E in the e-mobility case, and the PMI case (its disruptive effect on tobacco industry). After a deep analysis of the disruptive effects on business models of the digital transformation, the book explores digital communications through the Pietro Coricelli case (how a well-designed digital strategy can raise reputation and sales). The book also provides a new holistic approach and identifies a future leader, through the H-FARM case (how to disrupt business models and education). The book is aimed at researchers, students and practitioners, and provides an improved understanding of marketing and communications, and the evolution of the strategic, organisational, and behavioural model.

Although the world's poorest inhabited continent, Africa has recently shown signs of being a source of economic growth in the coming decades, with increased foreign investment - notably from China - and huge growth in GDP from a number of African states. In contrast to the heaving weight of books focusing on business opportunities in Asia, Eastern Europe and Latin America, Africa has been poorly served by academic publishing. This compendium of scholarship offers cutting-edge knowledge relating to business in Africa. The objectives of this collection include: To shed new light on the socio-cultural and historical underpinnings of business practice in Africa and their implications for promoting entrepreneurship and business behaviour in the region To consider the important constraints on business

activities in Africa, and the emerging 'best practice' for redressing their real and potential impacts To facilitate a better understanding of contemporary business practice in Africa through the application of relevant theories and models, including emergent ones. The Routledge Companion to Business in Africa is a comprehensive reference resource that provides the perfect platform for embarking on research and study into Africa from the business perspective.
