such processes, this book also looks at the mission of Apostle Paul as he led a purpose driven life to establish churches in the Roman Empire and his commitment to the benevolent offering. Clearly, those working the field of Christian philanthropy can use Paul as a model figure as they seek to establish worthwhile causes that meet the needs of

people universally. This book examines both the historical and current impact that faith-based organizations have on society. Included are the steps for individuals interested in establishing an NGO (non-governmental organization) and seeking funds. Worksheets are also provided. The author, Dr. Janell N. Harvey is a seasoned proposal developer who has established a

number of non-profit organizations while helping to garner millions in funds. "Dr, Harvey's research presents a worthwhile model that is easily adaptable within the faith based sector. Clearly, her reference to Apostle Paul's work is legitimate as he is a model figure within the Christian faith" Attorney Trai Irving Esq.

Senate documents Model Rules of Professional Conduct A notary is a public official responsible for independently verifying signatures and oaths. Depending on how a document is written, a notarization serves to

affirm the identity of a signer and the fact that they personally executed their signature. A notarization, or notarial act, officially documents the identity of a party to a document or transaction and the occasion of the signing that others can rely upon, usually at face value. A notary's authentication is intended to be reliable, to avoid the inconvenience of having to locate a signer to have them personally

verify their signature, as well as to document the execution of a document perhaps long after the lifetime of the signer and the notary. An oath is a sworn statement. In most cases a person will swear that a written statement, oral statement, or testimony they are about to give is true. A notary can document that the notary administered an oath to an individual. *Research Reporting*
