Patient Flow Harper Collins

An award-winning book from the author of *Jeremy Fink and the Meaning of Life* and *The Candymakers* for fans of *Wonder* and *Counting by Sevens*. Mia Winchell has synesthesia, the mingling of perceptions whereby a person can see sounds, smell colors, or taste shapes. Forced to reveal her condition, she must look to herself to develop an understanding and appreciation of her gift in this coming-of-age novel.

The Literary Guide to the Bible Model Rules of Professional Conduct

In his Nautilus Award-winning classic *Touching Spirit Bear*, author Ben Mikaelson delivers a powerful coming-of-age story of a boy who must overcome the effects that violence has had on his life. After severely injuring Peter Driscall in an empty parking lot, mischief-maker Cole Matthews is in major trouble. But instead of jail time, Cole is given another option: attend Circle Justice, an alternative program that sends juvenile offenders to a remote Alaskan island to focus on changing their ways. Desperate to avoid prison, Cole fakes humility and agrees to go. While there, Cole is mauled by a mysterious white bear and left for dead. Thoughts of his abusive parents, helpless Peter, and his own anger cause him to examine his actions and seek redemption—from the spirit bear that attacked him, from his victims, and, most importantly, from himself. Ben Mikaelson paints a vivid picture of a juvenile offender, examining the roots of his anger without absolving him of responsibility for his actions, and questioning a society in which angry people make victims of their peers and communities. *Touching Spirit Bear* is a poignant testimonial to the power of a pain that can destroy, or lead to healing. A strong choice for independent reading, sharing in the classroom, homeschooling, and book groups.

For fans of *Hatchet* and *Island of the Blue Dolphins* comes Theodore Taylor's classic bestseller and Lewis Carroll Shelf Award winner, *The Cay*. Phillip is excited when the Germans invade the small island of Curaçao. War has always been a game to him, and he's eager to glimpse it firsthand—until the freighter he and his mother are traveling to the United States on is torpedoed. When Phillip comes to, he is on a small raft in the middle of the sea. Besides Stew Cat, his only companion is an old West Indian, Timothy. Phillip remembers his mother's warning about black people: "They are different, and they live differently." But by the time the castaways arrive on a small island, Phillip's head injury has made him blind and dependent on Timothy. "Mr. Taylor has provided an exciting story...The idea that all humanity would benefit from this special form of color blindness permeates the whole book...The result is a story with a high ethical purpose but no sermon."—New York Times Book Review "A taut tightly compressed story of endurance and revelation...At once barbed and tender, tense and fragile—as Timothy would say, 'outrageous good.'"—Kirkus Reviews * "Fully realized setting...artful, unobtrusive use of dialect...the representation of a hauntingly deep love, the poignancy of which is rarely achieved in children's literature."—School Library Journal, Starred "Starkly dramatic, believable and compelling."—Saturday Review "A tense and moving experience in reading."—Publishers Weekly "Eloquently underscores the intrinsic brotherhood of man."—Booklist "This is one of the best survival stories since Robinson Crusoe."—The Washington Star · A New York Times Best Book of the Year · A School Library Journal Best Book of the Year · A Horn Book Honor Book · An American Library Association Notable Book · A Publishers Weekly Children's Book to Remember · A Child Study Association's Pick of Children's Books of the Year · Jane Addams Book Award · Lewis Carroll Shelf Award · Commonwealth Club of California: Literature Award · Southern California Council on Literature for Children and Young People Award · Woodward School Annual Book Award · Friends of the Library Award, University of California at Irvine

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have

had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Guidelines for the Evaluation and Control of Lead-based Paint Hazards in Housing Wiley

This book is dedicated to improving healthcare through reducing delays experienced by patients. With an interdisciplinary approach, this new edition, divided into five sections, begins by examining healthcare as an integrated system. Chapter 1 provides a hierarchical model of healthcare, rising from departments, to centers, regions and the "macro system." A new chapter demonstrates how to use simulation to assess the interaction of system components to achieve performance goals, and Chapter 3 provides hands-on methods for developing process models to identify and remove bottlenecks, and for developing facility plans. Section 2 addresses crowding and the consequences of delay. Two new chapters (4 and 5) focus on delays in emergency departments, and Chapter 6 then examines medical outcomes that result from waits for surgeries. Section 3 concentrates on management of demand. Chapter 7 presents breakthrough strategies that use real-time monitoring systems for continuous improvement. Chapter 8 looks at the patient appointment system, particularly through the approach of advanced access. Chapter 9 concentrates on managing waiting lists for surgeries, and Chapter 10 examines triage outside of emergency departments, with a focus on allied health programs Section 4 offers analytical tools and models to support analysis of patient flows. Chapter 11 offers techniques for scheduling staff to match patterns in patient demand. Chapter 12

surveys the literature on simulation modeling, which is widely used for both healthcare design and process improvement. Chapter 13 is new and demonstrates the use of process mapping to represent a complex regional trauma system. Chapter 14 provides methods for forecasting demand for healthcare on a region-wide basis. Chapter 15 presents queueing theory as a method for modeling waits in healthcare, and Chapter 16 focuses on rapid delivery of medication in the event of a catastrophic event. Section 5 focuses on achieving change. Chapter 17 provides a diagnostic for assessing the state of a hospital and using the state assessment to select improvement strategies. Chapter 18 demonstrates the importance of optimizing care as patients transition from one care setting to the next. Chapter 19 is new and shows how to implement programs that improve patient satisfaction while also improving flow. Chapter 20 illustrates how to evaluate the overall portfolio of patient diagnostic groups to guide system changes, and Chapter 21 provides project management tools to guide the execution of patient flow projects.
