commentaries on the politics threatening to affect the Alexander Turnbull Library was very pleasantly interrupted when geologist and historian Simon Nathan arrived with a pre-launch copy of his latest book, through the eyes of a miner, *The Photography of Joseph Divis*. A photographic history of mining in early New Zealand. Mining is the extraction of valuable minerals or other geological materials from the Earth, usually from an ore body, lode, vein, seam, reef or placer deposit. These deposits form a mineralized package that is of economic interest to the miner. Ores recovered by mining include metals, coal, oil shale, gemstones, limestone, chalk, dimension stone, rock salt, potash, gravel, and clay. Mining - Wikipedia.
