Peter Lang  
This volume offers a detailed conceptual framework for understanding and learning about technology innovation policies and programs, and

their implementation in the context of different countries. World Development Report 2009 OECD Publishing Published annually since 1992, the 2005 edition of this bestselling guide continues to gain fame as the best

available source for information on U.S. casinos. The new 2005 edition lists more than 650 casinos in 35 states and comes complete with maps of all states showing where the casinos are located, plus detailed maps of Las Vegas, Atlantic City, Reno and the

Mississippi gambling resort towns of Biloxi and Tunica.

As the editors note, "This volume includes many searching looks at the landscape, not just to understand ourselves, but to understand the context for other peoples' lives in other times, to unravel the landscapes they created and explain the meanings embedded in them.".

The country of Nepal is home to over one hundred distinct languages from four language

families. The current volume provides grammars, glossaries and texts for two of these languages:

Kristine A. Hildebrandt's grammar and glossary of Manange, of the Tamangic branch of the Tibeto-Burman language family, and Barbara Kelly's grammar and glossary of Sherpa, of the Tibetan (Bodish) branch. Each grammar provides a full description of the

phonology, morphology and syntax of the language, covering both the structural and functional properties of each. The glossaries contain lists of basic vocabulary, alternate forms, and comparisons with forms given in previous literature. The short texts provide insights into how speakers weave linguistic structures to produce fluent discourse.

*European Union World Bank Publications* This book investigates the EU's regional growth dynamics and, in particular, the reasons why peripheral and socio-economically disadvantaged areas have persistently failed to catch up with the rest of the Union. It shows that the capability of the knowledge-based growth model to deliver its expected benefits to

these areas crucially depends on tackling a specific set of socio-institutional factors which prevents innovation from being effectively translated into economic growth. The book takes an eclectic approach to the territorial genesis of innovation and regional growth by combining different theoretical strands into one model of empirical analysis covering the whole EU-25.

An in-depth comparative analysis with the United States is also included, providing significant insights into the distinctive features of the European process of innovation and its territorial determinants. The evidence produced in the book is extensively applied to the analysis of EU development policies. Funds and Games Edward Elgar Publishing  
Rising densities of human

settlements, migration and transport to reduce distances to market, and specialization and trade facilitated by fewer international divisions are central to economic development. The transformation s along these three dimensions density, distance, and division are most noticeable in North America, Western Europe, and Japan, but countries in Asia and

Eastern Europe are changing in ways similar in scope and speed. 'World Development Report 2009: Reshaping Economic Geography' concludes that these spatial transformation s are essential, and should be encouraged. The conclusion is not without controversy. Slum-dwellers now number a billion, but the rush to cities continues. Globalization is believed to benefit many, but not the billion people

living in lagging areas of developing nations. High poverty and mortality persist among the world's 'bottom billion', while others grow wealthier and live longer lives. Concern for these three billion often comes with the prescription that growth must be made spatially balanced. The WDR has a different message: economic growth is seldom balanced, and efforts to spread it out

prematurely will jeopardize progress. The Report: documents how production becomes more concentrated spatially as economies grow. proposes economic integration as the principle for promoting successful spatial transformation s. revisits the debates on urbanization, territorial development, and regional integration and shows how today's developers can reshape

economic geography. **Fertile Soil for Structural Funds?** Springer Science & Business Media Annotation This book brings together different perspectives on the role of conditionality, drawing on the experiences and lessons learned by the donor community, NGO critics and academic circles, and the borrowing countries, and provides a board

overview of contemporary approaches to conditionality in today's aid architecture.

The Coherence of EU Regional Policy W. W. Norton & Company  
Introduces the learning region as a theory to explain how regional actors perform regional learning. This title presents a discussion of concepts such as regional networks and social capital. It focuses on learning between regional actors and the

relations they have with one another and with other actors in their social context.

OECD Publishing  
Behind the mystery of economic growth stands another mystery: why do some places fare better than others? This book aims to discuss the main economic reasons for the existence of peaks and troughs in the spatial distribution of wealth and people, with a

special emphasis on the role of large cities and regional agglomerations in the process of economic development.

Since the 1990s, "adaptation studies" in the humanities has expanded beyond the boundaries of area studies. This innovative collection includes essays that challenge the boundaries of

art history, visual and cultural studies, queer theory and film studies. Whether analyzing the theoretical misprision of Judith Butler's concept of performativity, the parasitic infestation of Panoram jukeboxes by the American porn industry, or the ontological slippage that takes place when we perform an act of homage, the essays and interviews in *Adaptation Theories* envision fresh possibilities

for considering the transdisciplinary potential of adaptation. *Who's Bigger?* OECD Publishing The OECD Environmental Outlook to 2030 provides analyses of economic and environmental trends to 2030, and simulations of policy actions to address the key challenges. OECD Publishing Data and evidence don't lie - but for too long, our policy makers haven't paid them nearly enough attention. In 2014, an all-star team of leaders and thinkers from across the political spectrum came together to propose an exciting new vision for the country - one where policy makers base decisions not on politics or expedience, but on the hard evidence of what really

works. The first edition of Moneyball for Government did more than just spark conversations; it spurred meaningful action. Now, Michael Gerson and Rajiv Shah join the second edition of the book, as they explain a variety of ways to apply this revolution of rigor to foreign assistance. For anyone who believes that government must do better for America's children and their families,

Moneyball for Government is a home run. Contributing authors: Senator Kelly Ayotte, Senator Mark Warner, Glenn Hubbard, Gene Sperling, Melody Barnes, John Bridgeland, Kevin Madden, Howard Wolfson, Michael Gerson, Raj Shah

In this fascinating book, Steve Skiena and Charles Ward

bring quantitative analysis to bear on ranking and comparing historical reputations by aggregating the traces of millions of opinions, just as Google ranks webpages. They present rankings of more than one thousand of history's most significant people in science, politics, entertainment , and all areas of human endeavor.

**Adaptation Theories**

World Bank Publications

This book attempts to answer the question: "How can Europe 2020, the EU's new strategy for smart, sustainable and inclusive growth, lead to a stronger social EU with less poverty and greater social cohesion?" Examined in depth are achieving the EU's ambitious social objectives to lift at least 20 million people out of the risk of poverty and exclusion by 2020 and the Union's four other mutually

reinforcing targets. A key objective of the book is to take a critical look at and draw lessons from the past, 2000-2010 Lisbon Strategy. Another important objective is to explore the format and role of EU coordination and cooperation in the social field in the new EU governance framework, in a context marked by slow recovery after the global economic crisis. Finally, the book also

makes proposals for the further reinforcement of this coordination and cooperation and for the improvement of the different instruments available at EU, national and sub-national levels.
