These essays by scholars from six nations offers contributions to the

understanding of Stalinist terror in the 1930s. The essays explore in depth the background of the terror and patterns of persecution, while providing more empirically founded estimates of the numbers of Stalin's victims.

New Perspectives on HTML, CSS, and Dynamic HTML

Springer Science & Business Media

This monograph integrates theoretical perspectives on affect and learning with recent research in affective computing with an emphasis on building new learning technologies. The "new perspectives" come from the intersection of several research themes: □Basic research on emotion, cognition, and

motivation applied to learning environments -□Pedagogical and motivational strategies that are sensitive to affective and cognitive processes -□Multimodal Human Computer Interfaces, with a focus on affect recognition and synthesis -□Recent advances in affect-sensitive Intelligent Tutoring Systems - □Novel methodologies to investigate affect and learning - □Neuroscience research on emotions and learning Cengage Learning Today's current and future professionals can now discover the thorough instruction needed to build dynamic, interactive Web sites from scratch with NEW PERSPECTIVES ON HTML5, CSS3, AND JAVASCRIPT, 6E. Part of

the popular New Perspectives Series, this user-friendly book provides comprehensive coverage of HTML, CSS, and JavaScript with an inviting approach that starts with the basics and does not require any prior knowledge on the subject. Detailed explanations of key concepts and skills make even the most challenging topics clear and accessible. Case scenarios and case problems place the most complex concepts within an understandable and practical context. Readers develop important problem solving skills while working through the book's realistic exercises. Proven applications and an interesting approach

help readers retain the material and apply what they've learned in today's professional environment.

Neighbourhood Effects Research: New Perspectives Cengage Learning

Over the last 25 years a vast body of literature has been published on neighbourhood effects: the idea that living in more deprived neighbourhoods has a negative effect on residents' life chances over and above the effect of their individual characteristics. The volume of work not only reflects academic

and policy interest in this topic, but also the fact that we are still no closer to answering the question of how important neighbourhood effects actually are. There is little doubt that these effects exist, but we do not know enough about the causal mechanisms which produce them, their relative importance in shaping individual's life chances, the circumstances or conditions under which they are most important, or the most effective policy responses. Collectively, the chapters in this book offer new perspectives on these questions, and refocus the academic debate on neighbourhood effects. The book enriches the neighbourhood effects

literature with insights from a wide range of disciplines and countries.

Most of the papers in this volume originated as presentations at the conference Biblical Hebrew and Rabbinic Hebrew: New Perspectives in Philology and Linguistics, which was held at the University of Cambridge, 8–10th July, 2019. The aim of the conference was to build bridges between various strands of research in the field of Hebrew language studies that rarely meet, namely philologists working on Biblical Hebrew, philologists working on Rabbinic Hebrew and theoretical linguists.

This volume is the published outcome of this initiative. It contains peer-reviewed papers in the fields of Biblical and Rabbinic Hebrew that advance the field by the philological investigation of primary sources and the application of cutting-edge linguistic theory. These include contributions by established scholars and by students and early career researchers.

Since its very beginning, archaeology has in many senses always related to a much wider constituency than just archaeologists. This relationship between archaeology and the public has often been overlooked and constantly changes. Public archaeology, as a field of research and practice, has been developing since the 1970s in English-speaking countries, particularly in the United States, Britain, and Australia, and is

today beginning to spread to other parts of the world. Global expansion of public archaeology comes with the recognition of the need for a careful understanding of local contexts, particularly the culture and socio-political climate. This volume critically examines the current theories and practices of public archaeology through relevant case studies from different regions throughout the world, including: Japan, China, South Korea, New Caledonia, South Africa, Senegal, Jordan, Italy, Peru, Canada, the United Kingdom, the United States, and Australia. These case studies are examined from a wide variety of theoretical contexts, to provide a thorough and comprehensive guide to the state of public

archaeology today, as well as implications for its future. As the theory and practice of public archaeology continues to change and grow, archaeology's relationship with the broader community needs to be critically and openly examined. The contributions in this wide-ranging work are a key source of information for anyone practicing or studying archaeology in a public context.

This book offers a detailed analysis and assessment of the state of education round the world. The argument is made that education and curriculum practices are deficient for two

reasons. The first is the adoption by governments, policy-makers and practitioners of a set of knowledge practices that can be broadly characterised as empiricist and technician, and which has come to dominate how curricula are constructed and certainly how education systems and their work can be described. The second is the adoption of a model of curriculum that is both backward-looking and, in its own terms, confused and muddled. This book then sets out an alternative model, which is more cogent and better focused on human wellbeing.

For well over a century, the United Fruit Company (UFCO) has been the most vilified multinational

corporation operating in Latin America. Criticism of the UFCO has been widespread, ranging from politicians to consumer activists, and from labor leaders to historians, all portraying it as an overwhelmingly powerful corporation that shaped and often exploited its host countries. In this first history of the UFCO in Colombia, Marcelo Bucheli argues that the UFCO's image as an all-powerful force in determining national politics needs to be reconsidered. Using a previously unexplored source—the internal archives of Colombia's UFCO operation—Bucheli reveals that before 1930, the UFCO worked alongside a

government that granted it generous concessions and repressed labor unionism. After 1930, however, the country experienced dramatic transformations including growing nationalism, a stronger labor movement, and increasing demands by local elites for higher stakes in the banana export business. In response to these circumstances, the company abandoned production, selling its plantations (and labor conflicts) to local growers, while transforming itself into a marketing company. The shift was endorsed by the company's shareholders and financial analysts, who preferred lower profits with lower risks, and came at a time in which the demand for

bananas was decreasing in America. Importantly, Bucheli shows that the effect of foreign direct investment was not unidirectional. Instead, the agency of local actors affected corporate strategy, just as the UFCO also transformed local politics and society.

Now readers can master Web page design as they learn from the unique, hands-on approach found in NEW PERSPECTIVES HTML5 AND CSS3: COMPREHENSIVE, 7E. Each tutorial in this complete book challenges learners to put into practice the concepts they have just learned. Every tutorial includes a basic statement of the

problem, the goals to be achieved, and a helpful demonstration of how to complete the task to create a fully functional website. Readers do not need any prior experience with HTML or CSS or any specialized software other than a basic editor and Web browser. With the book's user-friendly approach, learners develop important problem-solving skills as they apply what they've learned in a professional environment. Successfully completing this book's tutorial cases and case problems can act a springboard to develop the reader's own professional portfolio that showcases strong abilities in website design. This edited book presents research results that are relevant for scientists, practitioners and policymakers who engage in knowledge and technology transfer from different perspectives. Empirical and conceptual chapters present original approaches regarding the current practice and policies behind technology transfer. By providing analyses at the macro, meso and micro-level, the respective chapters demonstrate how technology is moving

from various organizational contexts into new institutions and becoming a critical aspect for competitiveness.

New Perspectives on Economic Crime

Springer Nature

We are told again and again that the world has become increasingly complex and indecipherable. However, this book reminds us that we are no longer alone in the world, that it is time to move away from the mental categories of the Cold War and stop treating all those who challenge our vision of the international order as guilty “deviants” or “Barbarians.” The author challenges the diplomacy of Western states, who want to continue to rule the world against history, and in particular that of

France, which too often oscillates between arrogance, indecision, and ambiguity. The power play is stuck. The international order can no longer be regulated by a small club of oligarchs who exclude the weaker ones, ignore the demands of societies, and ignore the demands for justice that emerge from a new world where the actors are more numerous, more diverse and more restive to arbitrary disciplines. For this reason, this book also offers ways to think an international order that would be, if not fair, at least less unfair.

This edited collection provides a state-of-the-art overview of research on willingness to communicate (WTC) in a second and foreign language. In particular, it includes innovative studies seeking to demonstrate the ways in which WTC can be examined within the framework of complex dynamic systems, how

the construct is related to self-assessment, reticence and extroversion, and what it signifies in the case of immigrants. Another group of papers is related to the role of technology in fostering WTC in different contexts. The volume also comprises papers that touch on methodological issues in the study of WTC such as experience case sampling, the network approach or the integration of the macro- and micro-perspective. The book will be of value to researchers interested in the study of WTC but will also provide inspiration for students, teachers and materials writers.
