That is, until she discovers a mysterious letter that launches her on an undercover quest to research mythical beasts. With the help of her best friend, Charley, Abigail unearths little-known facts about mythical creatures, from the familiar unicorn to the bizarre bonnacon. Pop, her overly-strict grandfather, and Ninny, her nutty grandmother, may both be part of a reality more complicated and mystical than Abigail ever imagined. Will Abigail pursue top-secret knowledge at all costs or choose a path of safety? Her decision could bring eternal glory . . . or certain doom! In this scrapbook-style journal, Abigail's quest to investigate mythical beasts is full of adventure, mishap, spunky humor, colorful sketches, and historically based research.

In *The Future of the Internet: And How to Stop It* Jonathan Zittrain explores the dangers the internet faces if it fails to balance ever more tightly controlled technologies with the flow of innovation that has generated so much progress in the field of technology. Zittrain argues that today's technological market is dominated by two contrasting business models: the generative and the non-generative. The generative models - the PCs, Windows and Macs of this world - allow third parties to build upon and share through them. The non-generative model is more restricted; appliances such as the xbox, iPod and tomtom might work well, but the only entity that can change the way they operate is the vendor. If we want the internet to survive we need to change. People must wake up to the risk or we could lose everything.
