In 2009, BlackBerry controlled half of the smartphone market. Today that number is one percent. What went so wrong? Losing the Signal is a riveting

story of a company that toppled global giants before succumbing to the ruthlessly competitive forces of Silicon Valley. This is not a conventional tale of modern business failure by fraud and greed. The rise and fall of BlackBerry reveals the dangerous speed at which innovators race along the information superhighway. With unprecedented access to key players, senior executives, directors and competitors, Losing the Signal unveils the remarkable rise of a company that started above a bagel store in Ontario. At the heart of the story is an unlikely partnership between a visionary engineer, Mike Lazaridis, and an abrasive Harvard Business school grad, Jim Balsillie. Together, they engineered a pioneering pocket email device that became the tool of choice for presidents and CEOs. The partnership enjoyed only a brief moment on top of the world, however. At the very moment BlackBerry was ranked the world's fastest growing company internal feuds and chaotic growth crippled the company as it faced its gravest test: Apple and Google's entry in to mobile phones. Expertly told by acclaimed journalists, Jacquie McNish and Sean Silcoff, this is an entertaining, whirlwind narrative that goes behind the scenes to reveal one of the most compelling business stories of the new century.

"The Joy Luck Club is one of my favorite books. From the moment I first started reading it, I knew it was going to be incredible. For me, it was one of those once-in-a-lifetime reading experiences that you cherish forever. It inspired me as a writer and still remains hugely inspirational." —Kevin Kwan, author of Crazy Rich Asians Amy Tan's beloved, New York Times bestselling tale of mothers and daughters, now the focus of a new documentary Amy Tan: Unintended Memoir on Netflix Four mothers, four daughters, four families whose histories shift with the four winds depending on who's "saying" the stories. In 1949 four Chinese women, recent immigrants to San Francisco, begin meeting to eat dim sum, play mahjong, and talk. United in shared

unspeakable loss and hope, they call themselves the Joy Luck Club. Rather than sink into tragedy, they choose to gather to raise their spirits and money. "To despair was to wish back for something already lost. Or to prolong what was already unbearable." Forty years later the stories and history continue. With wit and sensitivity, Amy Tan examines the sometimes painful, often tender, and always deep connection between mothers and daughters. As each woman reveals her secrets, trying to unravel the truth about her life, the strings become more tangled, more entwined. Mothers boast or despair over daughters, and daughters roll their eyes even as they feel the inextricable tightening of their matriarchal ties. Tan is an astute storyteller, enticing readers to immerse themselves into these lives of complexity and mystery.

Journalist Walls grew up with parents whose ideals and stubborn nonconformity were their curse and their salvation. Rex and Rose Mary and their four children lived like nomads, moving among Southwest desert towns, camping in the mountains. Rex was a charismatic, brilliant man who, when sober, captured his children's imagination, teaching them how to embrace life fearlessly. Rose Mary painted and wrote and couldn't stand the responsibility of providing for her family. When the money ran out, the Walls retreated to the dismal West Virginia mining town Rex had tried to escape. As the dysfunction escalated, the children had to fend for themselves, supporting one another as they found the resources and will to leave home. Yet Walls describes her parents with deep affection in this tale of unconditional love in a family that, despite its profound flaws, gave her the fiery determination to carve out a successful life. -- From publisher description.

James Bamford has been the preeminent expert on the National Security Agency since his reporting revealed the agency's existence in the 1980s. Now Bamford describes the transformation of the NSA since 9/11, as the agency increasingly turns its high-tech ears on the American public. The Shadow Factory reconstructs how the NSA missed a chance to thwart the 9/11 hijackers and details how this mistake has led to a heightening of domestic surveillance. In disturbing detail, Bamford describes exactly how every American's data is being mined and what is being done with it. Any reader who thinks America's liberties are being protected by Congress will be shocked and appalled at what is revealed here.

Investigative Uses of Technology McGraw Hill

When the Pacific war began it was a case of "when not if" Darwin would be attacked. But nobody could have predicted the extraordinary scale and ferocity of the 19 February 1942 raid. A massive strike force, blooded at Pearl Harbor just weeks before, hit Darwin in the biggest Japanese air attack ever in the South Pacific. Since then, generations of Australians have been drawn to the stories and folklore of the Darwin action. But facts have blurred and mythology has thrived. What of the warning that never happened? What of the ghost ship actually sunk in the Atlantic a year earlier? Did a fighter pilot contrive a false combat record? Did the authorities cover up the raid? Why do Australians know so little about it? This is the book that tests these many Darwin myths and reveals new information: another ship sunk; the actual intent and nature of the attack; the precise extent of the Japanese losses. The Darwin raid is usually portrayed as a wholesale disaster for the Allies, and a day full of military ineptitude. Carrier Attack shows the defenders were alert and fought with purpose. Arguably it was the Japanese that wasted much of their attacking strength, and in this way the Darwin defenders avoided a much larger catastrophe. Carrier Attack provides a timely and fresh analysis of the raid. Most importantly, it draws on specially translated Japanese sources. About the Authors Dr Tom Lewis OAM is the award-winning author of 11 books. A long time resident of Darwin, he is the current Director of the Darwin Military Museum. In 2012 he was a major participant in the 70th anniversary of the Darwin raid, which included a multi-million dollar re-development of the Museum. Tom is a former naval officer whose service included a combat deployment to Baghdad. Peter Ingman is the grandson of an original Gallipoli Anzac who lived in 1930s Darwin. He has been a regular visitor to the Northern Territory since the 1980s when his father worked there as a surgeon. With a background as a business executive, he has a long interest in Australian military history. Peter currently manages an Adelaide-based publishing company.

The Taking of Jemima Boone MicroStrategy

"A rousing tale of frontier daring and ingenuity, better than legend on every front." — Pulitzer Prize-winning author Stacy Schiff A Goodreads Most Anticipated Book In his first work of narrative nonfiction, Matthew Pearl, bestselling author of acclaimed novel The Dante Club, explores the little-known true story of the kidnapping of legendary pioneer Daniel Boone's daughter and the dramatic aftermath that rippled across the nation. On a quiet midsummer day in 1776, weeks after the signing of the Declaration of Independence, thirteen-year-old Jemima Boone and her friends Betsy and Fanny Callaway disappear near the Kentucky settlement of Boonesboro, the echoes of their faraway screams lingering on the air. A Cherokee-Shawnee raiding party has taken the girls as the latest salvo in the blood feud between American Indians and the colonial settlers who have decimated native lands and resources. Hanging Maw, the raiders' leader, recognizes one of the captives as Jemima Boone, daughter of Kentucky's most influential pioneers, and realizes she could be a valuable pawn in the battle to drive the colonists out of the contested Kentucky territory for good. With Daniel Boone and his posse in pursuit, Hanging Maw devises a plan that could ultimately bring greater peace both to the tribes and the colonists. But after the girls find clever ways to create a trail of clues, the raiding party is ambushed by Boone and the rescuers in a battle with reverberations that nobody could predict. As Matthew Pearl reveals, the exciting story of Jemima Boone's kidnapping vividly illuminates the early days of America's westward expansion, and the violent and tragic clashes across cultural lines that ensue. In this enthralling narrative in the tradition of Candice Millard and David Grann, Matthew Pearl unearths a forgotten and dramatic series of events from early in the Revolutionary War that opens a window into America's transition from colony to nation, with the heavy moral costs incurred amid shocking new alliances and betrayals.

interviews friends, family, staff, former teachers, and politicians on both sides of the aisle to reveal a multifaceted view of the self-described Christian, Conservative, and Republican—in that order—from his beginnings in a large Irish Catholic family in Columbus, Indiana, through the scandals of his first election, to his time beside Donald Trump. This candid look at Mike Pence's life exposes his unexpected path to power and the individuals who influenced him along the way.
