Mastering Modern European History Sociology

Peter L. Berger is arguably the best-known American sociologist living today. Since the 1960s he has been publishing books on many facets of the American social scene, and several are now considered classics. So it may be hard to believe Professor Berger's description of himself as an "accidental sociologist." But that in fact accurately describes how he stumbled into sociology. In this witty, intellectually stimulating memoir, Berger explains not only how he became a social scientist, but the many adventures that this calling has led to. Rather than writing an autobiography, he focuses on the main intellectual issues that

motivated his work and the various people and situations he encountered in the course of his career. Full of memorable vignettes and colorful characters depicted in a lively narrative often laced with humor, Berger's memoir conveys the excitement that a study of social life can bring. The first part of the book describes Berger's initiation into sociology through the New School for Social Research, "a European enclave in the midst of Greenwich Village bohemia." Berger was first a student at the New School and later a young professor amidst a clique of like-minded individuals. There he published *The Social Construction of Reality* (with colleague Thomas Luckmann), one of his most successful books, followed by *The Sacred Canopy* on the sociology of religion, also still widely cited. The book covers Berger's experience as a "globe-trekking sociologist" including trips to Mexico, where he studied approaches to Third World

poverty; to East Asia, where he discovered the potential of capitalism to improve social conditions; and to South Africa, where he chaired an international study group on the future of post-Apartheid society. Berger then tells about his role as the director of a research center at Boston University. For over two decades he and his colleagues have been tackling such important issues as globalization, the secularization of Europe, and the ongoing dialectic between relativism and fundamentalism in contemporary culture. What comes across throughout is Berger's boundless curiosity with the many ways in which people interact in society. This book offers longtime Berger readers as well as newcomers to sociology proof that the sociologist's attempt to explain the world is anything but boring.
