JOHN SANTIAGO

Evolution and Prehistory: The Human Challenge Farrar, Straus and Giroux

Women of the Dawn tells the stories of four remarkable Wabanaki Indian women who lived in northeast America during the four centuries that devastated their traditional world. Their courageous responses to tragedies brought on by European contact make up the heart of the book. The narrative begins with Molly Mathilde (1665-1717), a mother, a peacemaker, and the daughter of a famous chief. Born in the mid-1600s, when Wabanakis first experienced the full effects of colonial warfare, disease, and displacement, she provided a vital link for her people through her marriage to the French baron of St. Castin. The sage continues with the shrewd and legendary healer Molly Ockett (1740-1816) and the reputed witchwoman Molly Molasses (1775-1867). The final chapter belongs to Molly Dellis Nelson (1903-1977) (known as Spotted Elk), a celebrated performer on European stages who lived to see the dawn of Wabanaki cultural renewal in the modern era.

Health, Human Rights, and the New War on the Poor Univ of California Press

Explains how and why human cultures vary so greatly across space and time Cultural Anthropology, 14/e helps students understand how humans vary culturally and why they got to be that way. It provides both a comprehensive and scientific introduction to cultural anthropology. This new edition has an expanded and updated focus on environmental issues. REVEL from Pearson is an immersive learning experience designed for the way today's student read, think, and learn. REVEL modernizes familiar and respected course content with dynamic media interactives and assessments, and empowers educators to increase engagement in the course, better connecting with students. The result is increased student engagement and improved learning. Teaching and Learning Experience This program will provide a better teaching and learning experience- for you and your students. It: Immersive Learning Experiences with REVEL: REVEL delivers immersive learning experiences designed for the way today's students read, think, and learn. Engaging Pedagogically-Driven Design: Learning Objectives in each chapter correspond to chapter summary materials A Clear Understanding of humans: Readers will learn the major variations in human kinship, economic, political, and religious systems and why it is significant. Focus on Contemporary issues: Students will understand contemporary social problems and how anthropology might be used to address them.

Ethical Approaches to Human Remains Createspace Independent Publishing Platform

Since Darwin's day, we've been told that sexual monogamy comes naturally to our species. Mainstream science—as well as religious and cultural institutions—has maintained that men and women evolved in families in which a man's possessions and protection were exchanged for a woman's fertility and fidelity. But this narrative is collapsing. Fewer and fewer couples are getting married, and divorce rates keep climbing as adultery and flagging libido drag down even seemingly solid marriages. How can reality be reconciled with the accepted narrative? It can't be, according to renegade thinkers Christopher Ryan and Cacilda Jethå. While debunking almost everything we "know" about sex, they offer a bold alternative explanation in this provocative and brilliant book.

Ryan and Jethå's central contention is that human beings evolved in egalitarian groups that shared food, child care, and, often, sexual partners. Weaving together convergent, frequently overlooked evidence from anthropology, archaeology, primatology, anatomy, and psychosexuality, the authors show how far from human nature monogamy really is. Human beings everywhere and in every era have confronted the same familiar, intimate situations in surprisingly different ways. The authors expose the ancient roots of human sexuality while pointing toward a more optimistic future illuminated by our innate capacities for love, cooperation, and generosity. With intelligence, humor, and wonder, Ryan and Jethå show how our promiscuous past haunts our struggles over monogamy, sexual orientation, and family dynamics. They explore why long-term fidelity can be so difficult for so many; why sexual passion tends to fade even as love deepens; why many middle-aged men risk everything for transient affairs with younger women; why homosexuality persists in the face of standard evolutionary logic; and what the human body reveals about the prehistoric origins of modern sexuality. In the tradition of the best historical and scientific writing, *Sex at Dawn* unapologetically upends unwarranted assumptions and unfounded conclusions while offering a revolutionary understanding of why we live and love as we do.

A New History of Humanity Cengage Learning

In this fully revised and updated second edition of *An Anthropology of Biomedicine*, authors Lock and Nguyen introduce biomedicine from an anthropological perspective, exploring the entanglement of material bodies with history, environment, culture, and politics. Drawing on historical and ethnographic work, the book critiques the assumption made by the biological sciences of a universal human body that can be uniformly standardized. It focuses on the ways in which the application of biomedical technologies brings about radical changes to societies at large based on socioeconomic inequalities and ethical disputes, and develops and integrates the theory that the human body in health and illness is not an ontological given but a moveable, malleable entity. This second edition includes new chapters on: microbiology and the microbiome; global health; and, the self as a socio-technical system. In addition, all chapters have been comprehensively revised to take account of developments from within this fast-paced field, in the intervening years between publications. References and figures have also been updated throughout. This highly-regarded and award-winning textbook (Winner of the 2010 Prose Award for Archaeology and Anthropology) retains the character and features of the previous edition. Its coverage remains broad, including discussion of: biomedical technologies in practice; anthropologies of medicine; biology and human experiments; infertility and assisted reproduction; genomics, epigenomics, and uncertain futures; and molecularizing racial difference, ensuring it remains the essential text for students of anthropology, medical anthropology as well as public and global health.

A Global Perspective Cengage Learning

In this book, an anthropologist sets his experiences as a teenager fighting in the Vietnam War within the larger sweep of American culture and society. When his daughter is born decades after he returned from war the violence of those experiences, long suppressed, emerges from the shadows.

Telecourse Study Guide for Haviland/Prins/Walrath/McBride's Anthropology: The Human

Challenge, 14th Cambridge University Press

A reader for cultural anthropology courses consisting of articles that are global, both in authorship and perspective. The articles focus on contemporary global concerns and place an emphasis on gender issues throughout.

Coming of Age in Samoa McGraw-Hill Humanities, Social Sciences & World Languages

Practical and insightful, CLASSIC READINGS IN CULTURAL ANTHROPOLOGY is a concise, inexpensive, and accessible reader that presents core historical and contemporary works that have been instrumental in shaping anthropological thought and research over the past decades. Carefully edited by author Dr. Gary Ferraro, the text includes classic readings from the disciplines of cultural anthropology and linguistics. Selected from scholarly works on the basis of their enduring themes and contributions to the discipline, these eminently relevant selections enable you to further explore anthropological perspectives on such key topics as culture; language and communication; ecology and economics; marriage and family; gender; politics and social control; supernatural beliefs; and issues of culture change. By providing this wide array of classic reading on foundational topics, this book delivers an excellent introduction to the field of cultural anthropology and the contributions it makes to understanding the world around us. In 1927, Zora Neale Hurston went to Plateau, Alabama, just outside Mobile, to interview

eighty-six-year-old Cudjo Lewis. Of the millions of men, women, and children transported from Africa to America as slaves, Cudjo was then the only person alive to tell the story of this integral part of the nation's history. Hurston was there to record Cudjo's firsthand account of the raid that led to his capture and bondage fifty years after the Atlantic slave trade was outlawed in the United States. In 1931, Hurston returned to Plateau, the African-centric community three miles from Mobile founded by Cudjo and other former slaves from his ship. Spending more than three months there, she talked in depth with Cudjo about the details of his life. During those weeks, the young writer and the elderly formerly enslaved man ate peaches and watermelon that grew in the backyard and talked about Cudjo's past—memories from his childhood in Africa, the horrors of being captured and held in a barracoon for selection by American slavers, the harrowing experience of the Middle Passage packed with more than 100 other souls aboard the *Clotilda*, and the years he spent in slavery until the end of the Civil War. Based on those interviews, featuring Cudjo's unique vernacular, and written from Hurston's perspective with the compassion and singular style that have made her one of the preeminent American authors of the twentieth-century, *Barracoon* masterfully illustrates the tragedy of slavery and of one life forever defined by it. Offering insight into the pernicious legacy that continues to haunt us all, black and white, this poignant and powerful work is an invaluable contribution to our shared history and culture.

Anthropology: The Human Challenge Jill Potash

Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

Pathologies of Power Cengage Learning

In this thorough introduction to theological anthropology, Joshua Farris offers an evangelical perspective on the topic. Farris walks the reader through some of the most important issues in traditional approaches to anthropology, such as sexuality, posthumanism, and the image of God. He addresses fundamental questions like, Who am I? and Why do I exist? He also considers the creaturely and divine nature of humans, the body-soul relationship, and the beatific vision.

Humans, Both Creaturely and Divine Rowman Altamira

Anthropology is a discipline very conscious of its history, and Alan Barnard has written a clear, balanced and judicious textbook that surveys the historical contexts of the great debates and traces the genealogies of theories and schools of thought. It also considers the problems involved in assessing these theories. The book covers the precursors of anthropology; evolutionism in all its guises; diffusionism and culture area theories, functionalism and structural-functionalism; action-centred theories; processual and Marxist perspectives; the many faces of relativism, structuralism and post-structuralism; and recent interpretive and postmodernist viewpoints.

Talking about People John Wiley & Sons

The book uses anthropological methods and insights to study the practice of anthropology. It calls for a paradigm shift, away from the publication treadmill, toward a more profile-raising paradigm that focuses on addressing a broad array of social concerns in meaningful ways.

The Story of the Last "Black Cargo" Pearson College Division

Bodley trenchantly critiques the most pressing global mega-problems, such as unsustainable growth, resource depletion, global warming, and poverty and conflict, and shows how anthropology makes it possible to find solutions.

[Sex at Dawn](#) Harcourt College Pub

This book is the outstanding and most frequently cited work in the field of Anthropology. It made the author world-famous and established her as the leader in her field for the next 50 years. One of the reasons this book became so famous was her observation that young Samoan women deferred marriage for many years while enjoying casual sex before eventually choosing a husband. This led to the Sexual Revolution that swept America in the 1960s and brought about the establishment of the Sexual Freedom League and other organizations. The Free Love generation idolized Margaret Mead.

An Anthropology of Anthropology Cengage Learning

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Human Rights and Anthropology Cengage Learning

Explore the most fascinating, creative, dangerous, and complex species alive today: you and your neighbors in the global village. With compelling photos, engaging examples, and select studies by anthropologists in far-flung places, the authors of CULTURAL ANTHROPOLOGY: THE HUMAN CHALLENGE, 15th Edition, provide a holistic view of anthropology to help you make sense of today's world. With this text, you will discover the different ways humans face the challenge of existence,

the connection between biology and culture in the shaping of human beliefs and behavior, and the impact of globalization on peoples and cultures around the world. Cultural Anthropology: The Human Challenge Cengage Learning

Theoretical Trajectories, Emergent Realities Pearson

In his gripping and provocative debut, anthropologist Jason De León sheds light on one of the most pressing political issues of our time—the human consequences of US immigration policy. The Land of Open Graves reveals the suffering and deaths that occur daily in the Sonoran Desert of Arizona as thousands of undocumented migrants attempt to cross the border from Mexico into the United States. Drawing on the four major fields of anthropology, De León uses an innovative combination of ethnography, archaeology, linguistics, and forensic science to produce a scathing critique of "Prevention through Deterrence," the federal border enforcement policy that encourages migrants to cross in areas characterized by extreme environmental conditions and high risk of death. For two decades, this policy has failed to deter border crossers while successfully turning the rugged terrain of southern Arizona into a killing field. In harrowing detail, De León chronicles the journeys of people who have made dozens of attempts to cross the border and uncovers the stories of the objects and bodies left behind in the desert. The Land of Open Graves will spark debate and controversy.

Barracoon Cengage Learning

Can forests think? Do dogs dream? In this astonishing book, Eduardo Kohn challenges the very foundations of anthropology, calling into question our central assumptions about what it means to be human—and thus distinct from all other life forms. Based on four years of fieldwork among the Runa of Ecuador's Upper Amazon, Eduardo Kohn draws on his rich ethnography to explore how Amazonians interact with the many creatures that inhabit one of the world's most complex ecosystems. Whether or not we recognize it, our anthropological tools hinge on those capacities that make us distinctly human. However, when we turn our ethnographic attention to how we relate to other kinds of beings, these tools (which have the effect of divorcing us from the rest of the world) break down. How Forests Think seizes on this breakdown as an opportunity. Avoiding reductionistic solutions, and without losing sight of how our lives and those of others are caught up in the moral webs we humans spin, this book skillfully fashions new kinds of conceptual tools from the strange and unexpected properties of the living world itself. In this groundbreaking work, Kohn takes anthropology in a new and exciting direction—one that offers a more capacious way to think about the world we share with other kinds of beings.
