 Scholars, journalists, and politicians uphold Muslim-ruled medieval Spain—"al-Andalus"—as a multicultural paradise, a place where Muslims, Christians, and Jews lived in harmony. There is only one problem with this widely accepted account: it is a myth. In this groundbreaking book, Northwestern University

scholar Darío Fernández-Morera tells the full story of Islamic Spain. The Myth of the Andalusian Paradise shines light on hidden features of this medieval culture by drawing on an abundance of primary sources that scholars have ignored, as well as archaeological evidence only recently unearthed. This supposed beacon of peaceful coexistence began, of course, with the Islamic Caliphate's conquest of Spain. Far from a land of tolerance, Islamic Spain was marked by religious and therefore cultural repression in all areas of life, and by the marginalization of Christians and other groups—all this in the service of social control by autocratic rulers and a class of religious authorities. As professors, politicians, and pundits continue to celebrate Islamic Spain for its "multiculturalism" and "diversity," Fernández-Morera sets the record straight—showing that a politically useful myth is a myth nonetheless.

Abu Sa'id 'Abd al-Hayy Gardizi was an author and historian living in the mid-eleventh century at the height of the Turkish Ghazvanid dynasty. His only known work, *The Ornament of Histories* ('Zayn al-akhbir'), is a hugely ambitious history of the Eastern Islamic lands AD 650-1041, spanning what is now Eastern Iran, Afghanistan and parts of the Central Asian Republics and Indo-Pakistan subcontinent. Gardizi's text is an extremely rare source of primary information about the rise of Islamic faith, culture and military dominance in these regions, and represents a significant contribution to our understanding of the early Islamic world. This is the first English translation of the original Persian text, and is accompanied by an introduction and commentary which details the historical, geographical and cultural context.

An unprecedented homage to modernist architecture from the 1920s up to the present day *Ornament Is Crime* is a celebration and a thought-provoking reappraisal of modernist architecture. The book proposes that modernism need no longer be confined by traditional definitions, and can be seen in both the iconic works of the modernist canon by Le Corbusier, Mies van der Rohe, and Walter Gropius, as well as in the work of some of the best contemporary architects of the twenty-first century. This book is a visual manifesto and a celebration of the most important architectural movement in modern history.

This second volume of a multi-volume series on the Gbysels collection -- probably the most comprehensive and beautiful collection of ethnic jewelry in the world -- presents nearly 800 extraordinary objects, most of which have never been shown to the public before, coming from Africa, Asia and America. Since time immemorial, earrings have been a means of seduction for women. Craftsmen the world over have set their imaginations to work, using every available material. Firstly they used flowers and grass, feathers and horns, wood, shells, and ivory. Mines and alluvial deposits offered stones and metals. Bold travellers and adventurous sailors set off in search of exotic goods. Their symbolism is also rich and complex: for the Kikuyu tribe in Kenya, a person's prestige is measured by the number of ear ornaments, as long as their lobes can stand without tearing. Statues of Buddha show him with long ears. In the archipelagos of Indonesia, the suitor's family offers earrings to seal an alliance. Leather earrings with pearls are a sign of a married woman's status for Masai. In the Philippines and among the Naga headhunters, the men's hunting exploits and prowess as warriors are embodied in the jewellery they wear on their ears.

Originally published in the 19th century in two volumes, this work by Auguste Racinet was an invaluable resource to artists, designers and architects when it was first published and continues to be so today. The period when Racinet's volumes were being published for the first time (1869 through 1887) saw a renewed interest in classicism and the decorative arts and Racinet's work was certainly influential. With 220 colour plates comprising over 1500 decorative motifs derived from illuminated manuscripts, jewellery, tiles, weaponry, wall painting and other sources, the book is not only inspirational, but also serves as both a visual reference of the motifs and an insight into the aesthetics of different cultures and periods.

The Mass Ornament today remains a refreshing tribute to popular culture, and its impressively interdisciplinary writings continue to shed light not only on Kracauer's later work but also on the ideas of the Frankfurt School, the genealogy of film theory and cultural studies, Weimar cultural politics, and, not least, the exigencies of intellectual exile.

The Broken Ornament Harvard University Press

This classic bestseller — the inspiration for the PBS series — is an "illuminating and even inspiring" portrait of medieval Spain that explores the golden age when Muslims, Jews, and Christians lived together in an atmosphere of tolerance (Los Angeles Times). This enthralling history, widely hailed as a revelation of a "lost" golden age, brings to vivid life the rich and thriving culture of medieval Spain, where for more than seven centuries Muslims, Jews, and Christians lived together in an atmosphere of tolerance, and where literature, science, and the arts flourished. "It is no exaggeration to say that what we presumptuously call 'Western' culture is owed in large measure to the Andalusian enlightenment... This book partly restores a world we have lost." —Christopher Hitchens, *The Nation*

Moorish Spain Basic Books

A magisterial, myth-dispelling history of Islamic Spain spanning the millennium between the founding of Islam in the seventh century and the final expulsion of Spain's Muslims in the seventeenth In Kingdoms of Faith, award-winning historian Brian A. Catlos rewrites the history of Islamic Spain from the ground up, evoking the cultural splendor of al-Andalus, while offering an authoritative new interpretation of the forces that shaped it. Prior accounts have portrayed Islamic Spain as a paradise of enlightened tolerance or the site where civilizations clashed.

Catlos taps a wide array of primary sources to paint a more complex portrait, showing how Muslims, Christians, and Jews together built a sophisticated civilization that transformed the Western world, even as they waged relentless war against each other and their coreligionists. Religion was often the language of conflict, but seldom its cause -- a lesson we would do well to learn in our own time.

An introduction to the art of decorative patterning, of equal value to craftworkers, collectors and students of art history. Trilling analyzes the historical importance of ornament across the world, whether in the monumental architecture of Mycenaean Greece or the inlaid vessels of Zhou Dynasty China, in the bronze mirrors of early Celtic Britain, or the carved and woven ornament of Native Americans. An impressive variety of ornament from the paleolithic age to the present day enables the reader to appreciate both its inherent form and beauty. Individual styles and patterns are traced through their evolution and interaction between cultures through trade, conquest and religious influences.
