Americans are taught to

believe that upward
mobility is possible for
anyone who is willing to
work hard, regardless of
their social status, yet it is
often those from affluent
backgrounds who land the
best jobs. Pedigree takes
readers behind the closed
doors of top-tier
investment banks,
consulting firms, and law
firms to reveal the truth
about who really gets
hired for the nation's

highest-paying entry-level jobs, who doesn't, and why. Drawing on scores of in-depth interviews as well as firsthand observation of hiring practices at some of America's most prestigious firms, Lauren Rivera shows how, at every step of the hiring process, the ways that employers define and evaluate merit are strongly skewed to favor job applicants from economically privileged backgrounds. She reveals how decision makers draw from ideas about

talent—what it is, what best signals it, and who does (and does not) have it—that are deeply rooted in social class. Displaying the "right stuff" that elite employers are looking for entails considerable amounts of economic, social, and cultural resources on the part of the applicants and their parents. Challenging our most cherished beliefs about college as a great equalizer and the job market as a level playing field, *Pedigree* exposes the class biases built into American notions about

the best and the brightest, and shows how social status plays a significant role in determining who reaches the top of the economic ladder.

How Businesses and

Organizations Can Operate in a Sustainable and Socially Responsible Way Asian Development Bank
 ""Indonesia telah masuk ke dalam era krisis minyak bumi. Harga minyak melambung, kapasitas produksi menyusut, sementara inefisiensi kelembagaan maupun regulasi merebak. Masa keemasan bisnis minyak di Indonesia telah usai dan sekarang minyak bumi malah menjadi beban. Di saat negara-negara produsen minyak mempersiapkan

diri memulai era keemasan minyak tahap kedua, Indonesia menuju era krisis energi. Dalam kondisi seperti ini, apa yang bakal kita hadapi tahun 2020 dan bagaimana kita menghadapinya? -----

 ----- “Rangkaian kejadian seputar masalah migas di tanah air, tentu tidak terjadi dengan kebetulan. Ada kekuatan virtual yang tidak menghendaki bisnis bernilai milyaran dollar ini berubah. Buku ini

melengkapi dan memperkaya wawasan kita tentang bagaimana kita memperlakukan sumber daya minyak kita.” -- Rhenald Kasali, Founder Rumah Perubahan “Saat ini Indonesia telah menjadi negara net oil importer. Produksi minyak kita berkisar 900.000 barel per hari, sementara kebutuhan BBM dalam negeri diperkirakan mencapai 1,4 juta barel per hari dan akan terus meningkat sejalan dengan pertumbuhan subsektor migas hilir. Peran migas

yang vital dan strategis mulai bergeser dan dikhawatirkan malah membebani keuangan negara. Demi mengembalikan peran penting dan strategis migas saat ini dan di masa depan, pengelolaan migas harus dilakukan secara bijaksana dan seoptimal mungkin." -- Saryono Hadiwidjoyo, Komite BPH Migas "Tidak dapat dimungkiri, kebutuhan akan migas perlu dipenuhi jika kita menginginkan pertumbuhan ekonomi yang berkesinambungan.

Kebijakan mengenai migas tidak bisa ditentukan hanya dengan mempertimbangkan segi tekno-ekonomis, tetapi juga sosio-politis. Buku ini dapat menjadi referensi bagi para pengambil kebijakan dan stakeholder industri migas, serta masyarakat luas yang ingin mendapat gambaran mengenai industri migas secara kontekstual." -- Widhyawan Prawiraatmadja, Deputi SKK Migas "Karakteristik industri migas: risiko tinggi dan investasi milyaran dollar.

Sayangnya masih banyak tantangan yang melingkupinya. Buku ini sangat layak dan perlu dibaca oleh mereka yang tertarik dan sedang mendalami industri migas nasional." -- Mardijono Nugroho, Patra Jasa "Ketahanan energi merupakan pilar penting ketahanan ekonomi sebagai salah satu unsur utama dalam ketahanan nasional. Namun pengelolaan energi di Indonesia saat ini tidak mendukung situasi yang diharapkan, seperti APBN masih bergantung pada

penerimaan migas, subsidi BBM, dan infrastruktur kurang memadai. Buku ini menggambarkan secara historis dan memotret secara realistis kondisi perminyakan dan energi di Indonesia. -- Tatang Arudji, Pertamina Tokyo Office 2006-2009/Board Auditor PPT & CO Japan""

panjang I. Princeton University Press
A Winner of the Educational Award by the World Safety Organization
Contractor safety management is often seen as nothing more than a subset of general safety management in that no special consideration needs to be given to understanding the difficulties of the contract environment. This leaves contractors endlessly juggling competing and sometimes contradictory demands made by the principal in

the name of safety and health. Instead of managing the work in accordance with the contract and the agreed health and safety management plan, contractors find themselves having to cope with moveable, ever-changing expectations about the way that health and safety is supposed to be managed. Contractor Safety Management explores how the contracting-principal relationship can influence safety outcomes and how a principal's role in

"overseeing" the safety performance of its contractors is different from managing safety in its own organization. It brings together perspectives from different disciplines including legal, health and safety management, operational, and contract and procurement management. The editor and chapter authors examine real-life cases, the issues that they present, and the way that safety management was handled. By sharing lessons across disciplines,

the book identifies critical issues in contractor safety management and raises awareness of its complexity and importance. It provides wide-ranging and comprehensive insight into the concerns confronting organizations, managers, and safety managers in contracting relationships. Offering guidance on how critical issues might be addressed, the book uses real-life cases to draw conclusions from successes and failures that can guide future

contracting strategies for effectively controlling health and safety risks in a contracting environment.
Jalan terjal menegakkan kebenaran Gramedia Pustaka Utama
 This book comprehensively describes social responsibility and sustainable development, with contributions from scientists and representatives from industry working in the field. The papers are innovative, cross-cutting and many share practice-

based experiences, some of which may be replicable elsewhere. Prepared by the Inter-University Sustainable Development Research Programme (IUSDRP) and the World Sustainable Development Research and Transfer Centre (WSD-RTC), it reiterates the current need to promote social responsibility. Social responsibility and sustainable development are two different concepts, whose integration over the years has led to significant

advances in the way enterprises see and perceive their operations. It is not only about policies or steps taken to meet legal requirements, but is also about social equality and environmental accountability, also bearing in mind the links with eco-efficiency, innovation, and the health and wellbeing of workers. According to ISO 26000, social responsibility is the responsibility of an organisation for the impacts of its decisions and activities on society

and the environment, through transparent and ethical behaviour that: a) contributes to sustainable development, including health and the welfare of society b) takes into account the expectations of stakeholders c) is in compliance with applicable law and consistent with international norms of behaviour d) is integrated throughout the organisation and practised in its relationships. But even though the relations between social

responsibility and sustainability are strong, it is still necessary to encourage organisations to adhere to, or at least follow the principles of sustainable development in their operations, giving something back to the community. As such, there is a need for a better understanding of how social responsibility is related to sustainable development, and of the identification of processes, methods and tools that may help the integration of these two important elements.

There is also a real need to showcase successful examples of how to structure behaviour and institutional practice in line with the sustainability challenges we face today. Chapter [Reviewing the Stakeholder Value Creation Literature: Towards a Sustainability Approach] is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com. *The Child's Paradise* CRC Press
This paper looks at the

possible paths for policy and development in Indonesia under the leadership of the seventh president of Indonesia, Joko Widodo. The first part is a stocktake of the challenges that lie ahead. The stocktake assesses the state of play in five areas: the political system; economic challenges; government and administration; social issues; and foreign affairs. Then two possible scenarios of governance under the new administration are considered: an outward-

looking reform path or an inward-looking resilience path. The country's seventh president, Joko Widodo, will need to decide whether to adopt one of these paths or select policies that combine elements from both the reform and the resilience paths.

Follow the "Proven Path" to successful implementation of enterprise resource planning. Effective forecasting, planning, and scheduling is fundamental to productivity—and ERP is a fundamental way to achieve it. Properly implementing ERP will give you a competitive advantage and help you run your business more effectively, efficiently, and responsively. This guide is structured to support all the people involved in ERP

implementation—from the CEO and others in the executive suite to the people doing the detailed implementation work in sales, marketing, manufacturing, purchasing, logistics, finance, and elsewhere. This book is not primarily about computers and software. Rather, its focus is on people—and how to provide them with superior decision-making processes for customer order fulfillment, supply chain management, financial planning, e-

commerce, asset management, and more. This comprehensive guide can be used as a selective reference for those, like top management, who need only specific pieces of information, or as a virtual checklist for those who can use detailed guidance every step of the way.

Description and Answers to Frequently Asked Questions Tajuk-tajuk Mochtar Lubis di harian Indonesia Raya Politics and government, Indonesia, 1966-; articles previously published in

Indonesia Raya daily. Orang miskin tanpa subsidi Warta ekonomi 2020 Indonesia dalam Bencana Krisis Minyak Nasional "Preparing Indonesian Youth: A Review of Educational Research offers insights into the challenges and prospects in preparing Indonesian youth for 21st century living. The chapters feature empirically-based case studies focusing on three aspects of education in Indonesia: teaching and teachers; school practices,

programs, and innovations; and the social contexts of youth and education. The case studies also represent different vantage points contributing to an enriched understanding of how larger social phenomenon—for example, education decentralisation in Indonesia (rural-urban and transnational) migration, international assessments, and the global feminist and women's movement—impact and interact with enacted visions of preparing all youth

educationally for work, as well as for meaningful participation in their respective communities and the Indonesian society at large.

Edward Elgar Pub These quick reads, based on McGraw-Hill bestsellers, are designed to meet the needs of busy people. Titles in the series

focus on each book's main themes and action ideas, reduced to a manageable page count for on-the-go readers. Goal-focused, commonsense techniques for stimulating greater productivity in the workplace and fostering true commitment.

Mutasi DNA powerhouse

John Wiley & Sons

Taken literally, the title "All of Statistics" is an exaggeration. But in spirit, the title is apt, as the book does cover a much broader range of topics than a typical introductory book on

mathematical statistics. This book is for people who want to learn probability and statistics quickly. It is suitable for graduate or advanced undergraduate students in computer science, mathematics, statistics, and related disciplines. The book includes modern topics like non-parametric curve estimation, bootstrapping, and classification, topics that are usually relegated to follow-up courses. The reader is presumed to know calculus and a little linear algebra. No

previous knowledge of probability and statistics is required. Statistics, data mining, and machine learning are all concerned with collecting and analysing data.

Dunia EKUIN dan PERBANKAN Yayasan Pelayanan Media Antiokhia (YAPAMA) End-of-office report of former President Habibie's cabinet, May 1998-Oct. 1999.

Country Reports and Assessments 2013-2014 Oxford University Press, USA
This highly successful

book brings together academic and practising lawyers to consider the key regulatory and contractual dimensions of the mature hydrocarbon province. Now in its second edition, the text has been fully updated. New chapters look at Energy Security, Law and Technology in the Oil Field and Acquisitions and Disposals.
Eksekutif Yayasan Pelayanan Media Antiokhia (YAPAMA) Dalam persaingan global, peranan teknologi tidak perlu disangsikan lagi.

Bangsa yang menguasai teknologi walau miskin sumber daya alam telah terbukti mampu mengeksploitasi bangsa yang kaya sumber daya alam namun terbelakang dalam penguasaan teknologi. Alam telah menyediakan sumber daya alam untuk dimanfaatkan oleh manusia dalam usaha memenuhi kebutuhan hidupnya. Salah satu sumber daya alam yang berperan serta dalam usaha mensejahterakan masyarakat adalah sumber daya energi, yang

digolongkan menjadi dua bagian besar, yaitu sumber daya energi tak terbarukan dan sumber daya energi terbarukan. Sumber daya energi tak terbarukan cadangannya sangat banyak namun karena selalu dieksploitasi terus-menerus akhirnya menjadi langka dan habis. Apabila terjadi hal yang demikian, manusia hendaknya mulai “menggali” sumber daya energi terbarukan dengan rekayasa teknologi yang telah dikuasai. Teknologi itu bersifat universal, boleh dipelajari oleh

semyua orang, tidak baik namun juga tidak buruk. Baik buruknya teknologi sangat ditentukan oleh yang empunya. Teknologi tidak statis, tetapi sangat dinamis dan selalu berkembang. Oleh sebab itu anda wajib mengikuti perkembangan IPTEK yang tiada berujung itu. Dalam buku ini dibahas konsep dasar pemanfaatan sumber daya energi terbarukan, antara lain PLT Panasbumi dengan energi geothermal sebagai penggerak utama, PLTMH dengan energi air sebagai

penggerak utama, PLT Bayu dengan energi angin sebagai penggerak utama, PLT Surya dengan energi panas matahari sebagai penggerak utama. Tidak ketinggalan pula dibahas konsep pemanfaatan unsur radioaktif sebagai sumber daya energi sebagai Pembangkit Listrik Tenaga Nuklir untuk tujuan damai dan CBM. Tidak ketinggalan pula dibahas tentang biofuel dan biogas dengan bahan baku yang ada dimasyarakat. Bila penguasaan teknologi

telah dimiliki, saatnya sekarang anda tinggal membangunkan kemauan yang hingga saat ini masih “disembunyikan” dalam usaha menggapai kesejahteraan masyarakat. Penulis berkeyakinan, anda merupakan salah satu insan ilmiah yang ingin dikenal dengan berperan serta ikut mensejahterakan masyarakat. Caranya sangat sederhana, timbulkan kemauan dengan pantang menyerah. Baca dan cermati isi buku ini mulai

halaman pertama hingga halaman terakhir hanya dengan menyisihkan waktu 30 menit saja setiap hari. Kemudian, pilih topik yang sesuai dengan sumber daya energi yang ada di masyarakat untuk diaplikasikan. Selamat berinovasi dan berkreasi, dengan keyakinan pasti berhasil.

Contractor Safety Management

After three volumes presenting the desolate scenario of corruption around the world, volume 4 (of the four-volume reference) focuses on anti-corruption strategies, including a wide variety of

approaches that illustrate the scale and difficulty of the task and offer no simple answers. Twenty-nine articles discuss general issues, control via codes of conduct and legal and formal means, anti-corruption measures in civil service and government agencies, prevention and sanctions, people and reform, and whistleblowing. The articles (reproduced in facsimile) are from

journals such as Comparative Politics, Crime, Law, and Social Change, Corruption Reform, and European Journal of Development Research. Editors Williams (politics, U. of Durham, UK) and Doig (public services management, Liverpool John Moores U., UK) made the selections. The volume is not indexed, except by name. c. Book News Inc.
