Despite the increasing prominence of Klossowski's philosophical work, there exists no full-length or sustained treatment of his writings on Nietzsche. This study analyses Klossowski's semiotic of intensity as a conceptual foundation for his philosophy and interpretation of Nietzsche, grounded in the central principles of his theory of signs. It then explores its implications for the categories of chance, causality, individuation and time, drawing a series of parallels between Klossowski's texts and the work of other scholars, such as McTaggart, Eco, D. Z. Albert, M. Silverstein, Meillassoux, N. Land and J. Stambaugh. Throughout, this work lends accessibility to Klossowski's often opaque and idiosyncratic style. It should be relevant to anyone interested in Klossowski's philosophical work, in contemporary Nietzsche scholarship, or in the 20th Century linguistic and existential Continental tradition.

Divided into two parts, this book examines the train of social theory from the 19th century, through to the 'organization of modernity', in relation to ideas of social planning, and as contributors to the 'rationalistic revolution' of the 'golden age' of capitalism in the 1950s and 60s. Part two examines key concepts in the social sciences. It begins with some of the broadest concepts used by social scientists: choice, decision, action and institution and moves on to examine the 'collectivist alternative': the concepts of society, culture and polity, which are often dismissed as untenable by postmodernists today. This is a major contribution to contemporary social theory and provides a host of essential insights into the task of social science today.

« Understanding today's Vocational Education and Training (VET) systems requires a comprehension of the rise and development, i.e. of the foundations of topical VET. This book is one of the first publications providing a comparative view of this development in Europe. Apart from older roots, the evolution of VET systems are one trigger of the modernization of economy, society and education itself. The 28 contributions, including countries like

Austria, Britain, Denmark, Finland, France, Germany, Switzerland, Italy, Lithuania, Norway, Spain, Sweden and Switzerland of renowned authors and experts in this field are organized in three sections: Concepts which are discussing theoretical approaches towards this phenomenon. Cases which stress specific developments of VET in a certain country or region and Challenges which are contextualizing the historical perspective in a topical policy context. »--

Do schools work differently in deprived and privileged neighbourhoods? As segregation is on the rise in many cities, this book explores how different neighbourhood contexts shape public organisations, by using an innovative approach that combines a Bourdieusian perspective and new institutional theory. Based on interviews and ethnographic data from two primary schools in Berlin, Germany, it shows how local social compositions, symbolic meanings of urban areas, and neighbourhood-based policy interventions structure schools. Educational professionals adapt to these structural differences. The book analyses how teachers' understandings and practices vary by local context – and what that means for the reproduction of urban inequality.

'There is no alternative to postmetaphysical thinking': this statement, made by Jürgen Habermas in 1988, has lost none of its relevance. Postmetaphysical thinking is, in the first place, the historical answer to the crisis of metaphysics following Hegel, when the central metaphysical figures of thought began to totter under the pressure exerted by social developments and by developments within science. As a result, philosophy's epistemological privilege was shaken to its core, its basic concepts were de-transcendentalized, and the primacy of theory over practice was opened to question. For good reasons, philosophy 'lost its extraordinary status', but as a result it also courted new problems. In *Postmetaphysical Thinking II*, the sequel to the 1988 volume that bears the same title (English translation, Polity 1992), Habermas addresses some of these problems. The first section of the book deals with the shift in perspective from metaphysical worldviews to the lifeworld, the unarticulated meanings and assumptions that accompany everyday thought and action in the mode of 'background knowledge'. Habermas analyses the lifeworld as a 'space of reasons' – even where language is not (yet) involved, such as, for example, in gestural communication and rituals. In the second section, the uneasy relationship between religion and postmetaphysical thinking takes centre stage. Habermas picks up where he left off in 1988, when he made the far-sighted observation that 'philosophy, even in its postmetaphysical form, will be able neither to replace nor to repress religion', and explores philosophy's new-found interest in religion, among other topics. The final section includes essays on the role of religion in

the political context of a post-secular, liberal society. This volume will be of great interest to students and scholars in philosophy, religion and the social sciences and humanities generally.

The lack of guidance on how to specify safety requirements that are properly traceable to the architecture design and to failure propagation models is one of the main reasons for their incompleteness and inconsistency, what turns to be a root cause of safety incidents. This book describes techniques to address this challenge in early and late stages of the development process.

Sind Verhaltenstherapie und Zwang - wie immer wieder behauptet - unvereinbar? Schliessen sich Freiheitsentzug und Beziehungsarbeit gegenseitig aus? Endet die Unterbringung von Kindern und Jugendlichen in geschlossenen Heimen sogar in der Deformation ihrer Persönlichkeit? In der Kinder- und Jugendhilfe werden diese Fragen seit Jahrzehnten mit immer wieder wechselnden Vorzeichen heftig diskutiert. Nur auf wissenschaftlich belastbare Daten kann sich eigentlich niemand berufen. Bernhard Stadlers empirisch fundierte Studie zu dieser Thematik schliesst damit eine Forschungslücke und widerlegt so manches Vorurteil. Am Beispiel des Mädchenheims Gauting und seiner Arbeit mit dissozialen Mädchen zeigt er, in welchen Fällen freiheitsentziehende Massnahmen in der Jugendhilfe helfen können und wo nicht. Er bezieht dazu subjektive Einschätzungen der Jugendlichen und ihrer Betreuer ebenso ein wie Testergebnisse, Interviews und die Diagnosen eines externen Instituts.

*Postmetaphysical Thinking II* Cengage Learning

Socrates said "To know thyself is the beginning of wisdom". Now Patrick Hoeller asks in this life counselling manuscript "What exactly do we know when we know ourselves?". Let it All Go is a book on life coaching combined with counselling, letting go of the past in order to live in the present etc. It is very much telling the reader that first of all everyone needs to know himself before he can understand others. And the first benefit of self knowledge is, according to Patrick Hoeller, happiness. With self knowledge comes the ability to choose the right things for us - from sandwiches to the right life partner. So a book which aims to raise awareness in readers that "to know others, one must first know

oneself" will be a useful addition to the range of self-help books on the market. Sometimes it takes a wrong turn to get you to the right place. Life is not meant to be lived perfectly but is to be lived. What you are waiting for is not as important as what happens to you while you are waiting. Not everyone will see your dreams and visions, you have to know and believe for yourself. The stretching of your faith is immediate pain that results in ultimate gain. It is in the waiting that you become who you are meant to be. In the midst of your struggle to find out who you are, there are infinite possibilities for beauty, hope, wonder and love. You have to trust in what feels true even if that truth requires you to ignore what you know. Things always make sense in hindsight. When you look back on your life, you can see that you went through the exact challenges that were necessary to allow for growth in the precise way that you most needed. All your personal struggles led you exactly where you really wanted to go but didn't know at that time. How difficult was it for you to let go?

Transport Revolutions: Moving People and Freight without Oil sets out the challenges to our growing dependence on transport fuelled by low-priced oil. These challenges include an early peak in world oil production and profound climate change resulting in part from oil use. It proposes responses to ensure effective, secure movement of people and goods in ways that make the best use of renewable sources of energy while minimizing environmental impacts. Transport Revolutions synthesizes engineering, economics, environment, organization, policy and technology, and draws extensively on current data to present important conclusions. The authors argue that land transport in the first half of the 21st century will feature at least two revolutions. One will involve the use of electric drives rather than internal combustion engines. Another will involve powering many of these drives directly from the electric grid - as trains and trolley buses are powered today - rather than from on-board fuel. They go on to discuss marine transport, whose future is less

clear, and aviation, which could see the most dramatic breaks from current practice. With its expert analysis of the politics and business of transport, Transport Revolutions is essential reading for professionals and students in transport, energy, town planning and public policy.

*Comparative Method in Education* Tectum

Timely and unique, this innovative volume provides a critical examination of the role of civil society and its relation to the state throughout left-led Latin America. Featuring a broad range of case studies from across the region, from the Bolivian Constitution to participative budgeting in Brazil to the communal councils in Venezuela, the book examines to what extent these new initiatives are redefining state-civil society relations. Does the return of an active state in Latin America imply the incorporation of civil society representatives in decision-making processes? Is the new left delivering on the promise of participatory democracy and a redefinition of citizenship, or are we witnessing a new democratic deficit? A wide-ranging analysis of a vital issue, both for Latin America and beyond.

**Centralblatt für Eisenbahnen und Dampfschiffahrt in Oesterreich**

The book presented here describes an outstanding attempt, not only to include children's views but to partner with children to develop the concept of well-being and to study the phenomenon as the children understand it. The authors do this by placing the concept of children's well-being within the existing discourses on the topic and by developing their unique theoretical approach to the concept. Then, and based on what children told them, the authors identify different domains and dimensions of children's well-being and touch upon its multifaceted nature. The book concludes with drawing research and policy implications from an integrated summary of the study's findings and lists indicator concepts that present an alternative framework and conceptualisation of well-being from a child standpoint.

**International Business Strategy**

Using the theory of Prisoner's Dilemma, Prisoners of Reason explores how neoliberalism departs from classic liberalism and how it rests on game theory.
