A LIFE ON THE VERGE OF COLLAPSE

Tyson Barrett used to be happy. Used to have a wife, a son, a thriving business.

Now he has nothing. Just long, sleepless nights broken only by nightmares so terrifying they threaten his sanity. So when he discovers an underground drug trial that will "cure" him, he jumps at the

chance. A CURE THAT SOUNDS TOO GOOD TO BE TRUE Everything seems great until things from Tyson's dreams start showing up in his waking life. Items from a dark past he thought he left buried at Sunnybrook Asylum. And when the nightmares threaten to return in full force, eerie trinkets aren't the only things waiting to come through. AN EVIL THAT CAN'T BE STOPPED Now Tyson must face a terror that has stalked him since childhood or risk losing everything he holds dear. The mind is full of halls. And some of the darkest passages lead to rooms better left closed.

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and

above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development

practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.

For tourism product development and the promotion of destinations in nowadays-competitive age it is necessary to achieve a clear profile of the travel behavior and preferences of actual and potential clients. This is the aim of these reports which provide a

sound basis of information on outbound tourism from the respective countries. They focus on the characteristics of outbound travel, give significant information on the generating markets and describe the target group profiles. These reports have become an essential and valuable tool for both the public and private sector in destinations interested in or receiving tourists from these markets as well as for the travel industry in these generating countries

The Routledge Handbook of Tourism Cities presents an up-to-date, critical and comprehensive overview of established and emerging themes in urban tourism and tourist cities. Offering socio-cultural perspectives and multidisciplinary insights from leading scholars, the book

explores contemporary issues, challenges and trends. Organised into four parts, the handbook begins with an introductory section that explores contemporary issues, challenges and trends that tourism cities face today. A range of topics are explored, including sustainable urban tourism, overtourism and urbanisation, the impact of terrorism, visitor-host interactions, as well as reflections on present and future challenges for tourism cities. In Part II the marketing, branding and markets for tourism cities are considered, exploring topics such as destination marketing and branding, business travellers and exhibition hosting. This section combines academic scholarship with real-life practice and case studies from cities. Part III discusses product and technology

developments for tourism cities, examining their supply and impact on different travellers, from open-air markets to creative waterfronts, from social media to smart cities. The final Part offers examples of how urban tourism is developing in different parts of the world and how worldwide tourism cities are adapting to the challenges ahead. It also explores emerging forms of specialist tourism, including geology and ecology-based tourism, socialist heritage and post-communist destination tourism. This handbook fills a notable gap by offering a critical and detailed understanding of the diverse elements of the tourist experience today. It contains useful suggestions for practitioners, as well as examples for theoretical frameworks to students in the fields of

urban tourism and tourism cities. The handbook will be of interest to scholars and students working in urban tourism, heritage studies, human geography, urban studies and urban planning, sociology, psychology and business studies.

China's rise and stepped-up involvement in Southeast Asia have prompted a blend of anticipation and unease among its smaller neighbors. The stunning growth of China has yanked up the region's economies, but its militarization of the South China Sea and dam building on the Mekong River has nations wary about Beijing's outsized ambitions. Southeast Asians long felt relatively

secure, relying on the United States as a security hedge, but that confidence began to slip after the Trump administration launched a trade war with China and questioned the usefulness of traditional alliances. This compelling book provides a snapshot of ten countries in Southeast Asia by exploring their diverse experiences with China and how this impacts their perceptions of Beijing's actions and its long-term political, economic, military, and "soft power" goals in the region.

Can technology and human beings coexist in a mutually beneficial way? In this ground-breaking book, N. Chandrasekaran, chairman of Tata Sons,

the holding company and promoter of more than 100 Tata operating companies, presents a radical reimagining of the future of technology and reveals how it has the potential to solve the world's biggest challenges. He imagines 2030: India is among the world's top three economies, with all Indians using advanced technology to do their job or get their job done, and having access to quality jobs, better healthcare and skill-based education. And he says: this reality is possible. It is within reach. With Bridgital. To the coming disruption of artificial intelligence, he proposes an ingenious solution: to use it as an aid. Instead of taking jobs away, AI can generate them. Instead of replacing workers, AI will assist them. Chandrasekaran and his co-

author, Roopa Purushothaman, chief economist of the Tata Group, show how the Bridgital model can address our divide between rich and poor, skilled and unskilled, and can provide better service delivery in health, transport, law and education. It could create and impact millions of jobs around the world. One of the country's foremost industry leaders and pioneers, N. Chandrasekaran brings his expertise of over thirty years with the Tata Group to offer India as a blueprint for building a prosperous planet where digital and physical worlds work together and everyone is included in the growth story. It's a powerful vision for the future. Foreword by Ratan N. Tata

A defining moment in James Law's

architectural career occurred in 2000 when he was invited to design of both architecture and technology of the Dickson Cyber Express Shopping Mall – the world’s first "Bricks and Clicks" retail complex in Hong Kong. This led to James coining the term "Cybertecture," to symbolize a new kind of design which merges technology and architecture as a future design that brings people "Live The Future." With growing reputation, James became an active advocate in the issues of future technology and design. As a dual design concept, Cybertecture is a broadspectrum design philosophy that can be applied to an infinite number of different types of projects and scenarios. The ultimate goal is to create a better world, where endeavours, processes and events take place in

spaces that introduce people to a new level of comprehension and wisdom.

Why the luxury market's fate rests in Chinese wallets The media has negatively focused on the Chinese politicaladministration clamping down on gifting. Observers have come todoubt

the strength of Chinese consumption as the key driver for luxury. The Bling Dynasty illustrates how doubts about Chinese consumption are ill-founded and Chinese luxury demand is on the cusp of becoming dominant. This book contains the research and expert views companies need to understand and address the new challenges posed by this dominance. Each chapter brings a different perspective, covering complex aspects of luxury consumption, with illustrations and real-world examples that support the research. Readers will gain insights through interviews with brand executives, retailers, experts, and consumers. As an economic heavyweight, China is fast realizing its role in the luxury market. Chinese consumers should be accounting for

more than a third of the global luxury market today, and half, if not more, in ten years' time. The Bling Dynasty runs counter to the conventional wisdom that expanding sectors become more global. Luxury is actually becoming over-dependent on Chinese sales. Readers will: Understand how Western brands developed in Asia and the challenges they are met with, notably ubiquity Learn why Chinese are purchasing luxury items abroad and what it means for the future of the sector Gain insights on why there are no Chinese luxury brands challenging Western models Realize that Chinese consumers are becoming similar to their American peers and that luxury competition goes way beyond pre-conceptions China's big spenders are increasingly mobile and

this is affecting key markets. The Bling Dynasty provides new research and a comprehensive look at the booming business of luxury and the Chinese wallet.

Cities Without Ground Penguin UK

The Chinese are known throughout the world as avid gamblers with a long history of participation in games of chance. Historians have documented wagering on such games as far back as the early Chinese dynasties. Despite measures by ancient Chinese rulers to contain gambling, it proliferated, and Chinese games have evolved and multiplied since then. Desmond Lam provides a unique look into the little-known world of Chinese gambling from historical, cultural, psychological, and social perspectives. Chinese gamblers

regularly patronize casinos in the United States, Canada, and Australia. The recent expansion of gambling in East Asia has attracted much global media attention. Macau, the only place in China where casino gambling is now legal, easily surpasses Las Vegas as the world's largest casino gaming market. Each year, Chinese from mainland China, Hong Kong, and Taiwan account for almost 90 percent of visitors to Macau. The expansion of the Chinese gambling industry has brought about much harm to Chinese communities, despite all of the development it has also stimulated. This book is the first to examine the beliefs, motivations, attitudes, and behaviors of Chinese gamblers, and will be of interest to students of history and sociology, as well

as those studying the history and culture of China.

This report represents the findings of a survey, that was undertaken between April and September 2000, to assess the level of public-private sector co-operation around the world and its impact on tourism competitiveness. As well as the summary of the findings and the detailed questionnaire responses it also has analysis of 80 case studies. The analysis looks at the way forward and the need for long-term co-operation

strategies. It also explains the importance of a competitive environment to stimulate competitive advantage and the critical role of partnership between all stakeholders to provide a framework for sustainable tourism development.

A gripping account of the Ryder Cup battle at Gleneagles, September 2014 As the Ryder Cup arrives at Gleneagles in Autumn 2014, Europe is the indisputable dominant force. They have won five of

the last six matches, including the Medinah Miracle two years earlier. On that occasion they had rallied from 10-4 down to snatch victory and retain the trophy. It was the second consecutive match that had been settled by a single point. For America it was a sickening defeat. Following the devastating loss, the Americans pulled out all the stops for 2014, sending a clear signal with the appointment of veteran Ryder Cup hero Tom Watson as captain. Opinionated and complicated, Watson is one of the legends of the game and hugely popular in both the United States and Europe. Put under pressure, the Europeans eschewed veterans such as Colin Montgomerie in favor of an outlier: Irishman Paul McGinley, a diminutive stalwart touring pro, a team man, and an

astute tactician. It will be a fight between acumen and aura. This book tells the inside story of this enthralling contest from the build-up through to the dramas of the week at Gleneagles. Will

the American team snatch victory from the jaws of defeat, re-entering the race and asserting themselves as the dominant force in world golf once more?
