Ethnic Community Builders: Mexican-Americans in Search of Justice and Power is an oral history of Mexican-American activism in San JosZ, California, over the last half century. The authors present interviews of 14 people of various stripes—teachers, politicians, radio personalities—who have been influential in the development of a major urban center with a significant ethnic population. These activists tell the stories of their lives and work with engaging openness and honesty, allowing readers to witness their successes and failures. This vivid ethnography of a Mexican-American community serves as a model for activism wherever ethnic groups seek change and justice.

Enrique's Journey Harper Collins

Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive

approach to reform.

An astonishing story that puts a human face on the ongoing debate about immigration reform in the United States, now updated with a new Epilogue and Afterword, photos of Enrique and his family, an author interview, and more—the definitive edition of a classic of contemporary America Based on the Los Angeles Times newspaper series that won two Pulitzer Prizes, one for feature writing and another for feature photography, this page-turner about the power of family is a popular text in classrooms and a touchstone for communities across the country to engage in meaningful discussions about this essential American subject. Enrique’s Journey recounts the unforgettable quest of a Honduran boy looking for his mother, eleven years after she is forced to leave her starving family to find work in the United States. Braving unimaginable peril, often clinging to the sides and tops of freight trains, Enrique travels through hostile worlds full of thugs, bandits, and corrupt cops. But he pushes forward, relying on his wit, courage, hope, and the kindness of strangers. As Isabel Allende writes: “This is a twenty-first-century Odyssey. If you are going to read only one nonfiction book this year, it has to be this one.” Praise for Enrique’s Journey “Magnificent . . . Enrique’s Journey is about love. It’s about family. It’s about home.”—The Washington Post Book World “[A] searing report from the immigration frontlines . . . as harrowing as it is heartbreaking.”—People (four stars) “Stunning . . . As an adventure narrative alone, Enrique’s Journey is a worthy read. . . . Nazario’s impressive piece of reporting [turns] the current immigration controversy from a political story into a personal one.”—Entertainment Weekly “Gripping and harrowing . . . a story begging to be told.”—The Christian Science Monitor “[A] prodigious feat of reporting . . . [Sonia Nazario is] amazingly thorough and intrepid.”—Newsday *World Development Report 2018* The CircuitStories from the Life of a Migrant Child

A revealing look at the experiences of first generation students on elite campuses and the hidden curriculum they must master in order to succeed College has long been viewed as an opportunity for advancement and mobility for talented students regardless of background. Yet for first generation students, elite universities can often seem like bastions of privilege, with unspoken academic norms and social rules. The Hidden Curriculum draws on more than one hundred in-depth interviews with students at Harvard and Georgetown to offer vital lessons about the challenges of being the first in the family to go to college, while also providing invaluable insights into the hurdles that all undergraduates face. As Rachel Gable follows two cohorts of first generation students and their continuing generation peers, she discovers surprising similarities as well as striking differences in their college experiences. She reveals how the hidden curriculum at legacy universities often catches first generation students off guard, and poignantly describes the disorienting encounters on campus that confound them and threaten to derail their success. Gable shows how first-gens are as varied as any other demographic group, and urges universities to make the most of the diverse perspectives and insights these talented students have to offer. The Hidden Curriculum gives essential guidance on the critical questions that university leaders need to consider as they strive to support first generation students on campus, and demonstrates how universities can balance historical legacies and elite status with practices and policies that are equitable and inclusive for all students.

Fictions of Integration Springer

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual’s health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Diary of a Reluctant Dreamer Taylor & Francis

Award-winning illustrator Duncan Tonatiuh brings to life debut author Gloria Amescua’s lyrical biography of an indigenous Nahua woman from Mexico who taught and preserved her people’s culture through modeling for famous artists She was Luz Jiménez, child of the flower-song people, the powerful Aztec, who called themselves Nahua— who lost their land but who did not disappear. As a young Nahua girl in Mexico during the early 1900s, Luz learned how to grind corn in a metate, to twist yarn with her toes, and to weave on a loom. By the fire at night, she listened to stories of her community’s joys, suffering, and survival, and wove them into her heart. But when the Mexican Revolution came to her village, Luz and her family were forced to flee and start a new life. In Mexico City, Luz became a model for painters, sculptors, and photographers such as Diego Rivera, Jean Charlot, and Tina Modotti. These artists were interested in showing the true face of Mexico and not a European version. Through her work, Luz found a way to preserve her people’s culture by sharing her native language, stories, and traditions. Soon, scholars came to learn from her. This moving, beautifully illustrated biography tells the remarkable story of how model and teacher Luz Jiménez became “the soul of Mexico”—a living link between the indigenous Nahua and the rest of the world. Through her deep pride in her roots and her unshakeable spirit, the world came to recognize the beauty and strength of her people. The book includes an author’s note, timeline, glossary, and bibliography.

This volume addresses the interface of two major national problems: the epidemic of HIV/AIDS and the widespread use of illegal injection drugs. Should communities have the option of giving drug users sterile needles or bleach for cleaning needs in order to reduce the spread of HIV? Does needle distribution worsen the drug problem, as opponents of such programs argue? Do they reduce the spread of other serious diseases, such as hepatitis? Do they result in more used needles being carelessly discarded in the community? The panel takes a critical look at the available data on needle exchange and bleach distribution programs, reaches conclusions about their efficacy, and offers concrete recommendations for public policy to reduce the spread of HIV/AIDS. The book includes current knowledge about the epidemiologies of HIV/AIDS and injection drug use; characteristics of needle exchange and bleach distribution programs and views on those programs from diverse community groups; and a discussion of laws designed to control possession of needles, their impact on needle sharing among injection drug users, and their implications for needle exchange programs.

Learning to Realize Education’s Promise UNM Press

In his first year of school, Francisco understands little of what his teacher says. But he is drawn to the silent, slow-moving caterpillar in the jar next to

his desk. He knows caterpillars turn into butterflies, but just how do they do it? To find out, he studies the words in a butterfly book so many times that he can close his eyes and see the black letters, but he still can't understand their meaning. Illustrated with paintings as deep and rich as the wings of a butterfly, this honest, unsentimental account of a schoolchild's struggle to learn language reveals that our imaginations powerfully sustain us. La Mariposa makes a subtle plea for tolerance in our homes, our communities, and in our schools.
