1. MOTIVATION In many physical situations, a plant model is often provided with a qualitative or quantitative measure of associated model uncertainties. On the one hand, the validity of the model is guaranteed only inside a frequency band, so that nearly nothing can be said about the behavior of the real plant at high frequencies. On the other hand, if the model is derived on the basis of physical equations, it can be parameterized as a function of a few physical parameters, which are usually not perfectly known in practice. This is e.g. the case in aeronautical systems: as an example, the ae- dynamic model of an airplane is derived from the flight mechanics eq- tions. When synthesizing the aircraft control law, it is then necessary to take into account uncertainties in the values of the stability derivatives, which correspond to the physical coefficients of the aerodynamic model. Moreover, this airplane model does not perfectly represent the be- vior of the real aircraft. As a simple example, the flight control system or the autopilot are usually synthesized just using the aerodynamic model, thus without accounting for the flexible mechanicalstructure: the c- responding dynamics are indeed considered as high frequency neglected 1 dynamics, with respect to the dynamics of the rigid model .

Creating Q\*bert and Other Classic Video Arcade Games takes you inside the video arcade game industry during the classic decades of the 1980s and 1990s. Warren Davis, the creator of the groundbreaking Q\*bert, worked as a member of the creative teams who developed some of the most popular video games of all time, including Joust 2, Mortal Kombat, NBA Jam, and Revolution X. In a witty and entertaining narrative, Davis shares insightful stories that offer a behind-the-scenes look at what it was like to work as a designer and programmer at the most influential and dominant video arcade game manufacturers of the era, including Gottlieb, Williams/Bally/Midway, and Premiere. Likewise, the talented artists, designers, creators, and programmers Davis has collaborated with over the years reads like a who's who of video gaming history: Eugene Jarvis, Tim Skelly, Ed Boon, Jeff Lee, Dave Thiel, John Newcomer, George Petro, Jack Haegar, and Dennis Nordman, among many others. The impact Davis has had on the video arcade game industry is deep and varied. At Williams, Davis created and maintained the revolutionary digitizing system that allowed actors and other photo-realistic imagery to be utilized in such games as Mortal Kombat, T2, and NBA Jam. When Davis worked on the fabled Us vs. Them, it was the first time a video game integrated a live action story with arcade-style graphics. On the one-of-a-kind Exterminator, Davis developed a brand new video game hardware system, and created a unique joystick that sensed both omni-directional movement and rotation, a first at that time. For Revolution X, he created a display system that simulated a pseudo-3D environment on 2D hardware, as well as a tool for artists that facilitated the building of virtual worlds and the seamless integration of the artist's work into game code. Whether you're looking for insights into the Golden Age of Arcades, would like to learn how Davis first discovered his design and programming skills as a teenager working with a 1960s computer called a Monrobot XI, or want to get the inside scoop on what it was like to film the Rock and Roll Hall of Fame band Aerosmith for Revolution X, Davis's memoir provides a backstage tour of the arcade and video game industry during its most definitive and influential period.

Madhurima Pandey is twenty-five, single, and gradually coming to terms with the annoying 'you're next' nudges from family and friends. But soon they realize that chances of finding a groom for her are slim-mainly because she's not. At 93 kilos, she knows she isn't the ideal weight for marriage, even if her family believes she's the ideal age. Despite her reservations, the hunt begins, and so does a spree of rejections until Harsh comes along. Madhu cannot believe that a boy with no obvious flaws has agreed to marry her. Low self-esteem makes her suspect he's either impotent or a homosexual, but she doesn't turn down the proposal immediately. A negligible period of courtship and a hurried engagement follow. But does Madhurima really find her happily-ever-after? Or are there more surprises in store? Jovial, witty and unapologetically honest, Madhurima Pandey's story of struggle and survival in the run-up to her D-Day gives you a refreshingly new take on the big fat Indian wedding.

"This volume of measurement instruments in the English language arts is the second one produced by the Research Instruments Project (TRIP), which was designed to collect and evaluate research instruments in language arts, language and language development, literacy, literature, oral language, reading, teacher knowledge/attitudes, and writing. The 160 measurement instruments are arranged alphabetically by category; within each category, measures are listed alphabetically by author. All instruments are cross-referenced by author. The age range indicated is the specific age grouping as stated by the authors or the age of the sample to whom the instrument was administered. The description of the instrument provides the purpose of the instrument, the date of construction, and a physical description of the instrument--often including sample items and administration data (directions, time, scoring procedures, and so forth). The lack of reliability and validity data for instruments is indicated when the information was unavailable. In the case of tables of difficulty, indexes, and so on, the data contained are summarized and the complete data are made available with the test or references cited. Der Künstler Manfred Bockelmann, porträtiert seit Jahren junge Menschen, die dem Nationalsozialismus zum Opfer fielen. Bockelmann möchte damit 'Zeichen gegen das Vergessen' setzen und zumindest einigen wenigen Namen und Nummern Gesichter geben, Menschen aus der Anonymität der Statistik herausheben. Die porträtierten Kinder und Jugendlichen wurden am Wiener Spiegelgrund und in den Konzentrationslagern Auschwitz-Birkenau, Theresienstadt sowie anderen zu Opfern des Nationalsozialismus. Gerade in diesen Bildern der damals so genannten 'Unreinen' zeigt sich eine reine Menschlichkeit. Der Anspruch des Künstlers, 'gegen das Vergessen' zu zeichnen, meint nicht nur diese ganz besonderen jungen Menschen, die einen Namen und eine Biografie haben, sondern zielt darauf ab, den Wert einer empathischen Mitmenschlichkeit nicht zu vergessen. Anteil zu nehmen, nicht wegzusehen, sich zu identifizieren - das ist die Botschaft.0Exhibition: Leopold Museum, Wien, Austria (17.05.-02.09.2013).
