Human service organizations are under increasing pressure to demonstrate that their programs work. *Organization Practice, Second Edition* helps students and professionals in human services and nonprofit management understand complex behaviors in organizations. This new edition provides a new, practical model for understanding cultural identities within organizations. Also, it is significantly revised to include numerous real-world cases, critical thinking questions, empirical support, and engaging exercises. Social workers, as well as public health and nonprofit administrators will benefit from the insights in this book.

"Move over, Scout Finch! There's a new contender for feistiest girl in fiction, and her name is Swiv." -USA Today, "Best Books of the Year" "Toews is a master of dialogue." -New York Times Book Review, Editors' Choice "A revelation." -Richard Russo NPR Best Books of the Year \* Shortlisted for the Scotiabank Giller Prize \* Writers' Trust Fiction Prize Finalist \* Indie Next Pick \* Amazon Editors' Pick \* Apple Book of the Month From the bestselling author of *Women Talking* and *All My Puny Sorrows*, a compassionate, darkly humorous, and deeply wise novel about three generations of women.

"You're a small thing," Grandma writes, "and you must learn to fight." Swiv's Grandma, Elvira, has been fighting all her life. From her upbringing in a strict religious community, she has fought those who wanted to take away her joy, her independence, and her spirit. She has fought to make peace with her loved ones when they have chosen to leave her. And now, even as her health fails, Grandma is fighting for her family: for her daughter, partnerless and in the third term of a pregnancy; and for her granddaughter Swiv, a spirited nine-year-old who has been suspended from school. Cramped together in their Toronto home, on the precipice of extraordinary change, Grandma and Swiv undertake a vital new project, setting out to explain their lives in letters they will never send. Alternating between the exuberant, precocious voice of young Swiv and her irrepressible, tenacious Grandma, *Fight Night* is a love letter to mothers and grandmothers, and to all the women who are still fighting-painfully, ferociously- for a way to live on their own terms.

The Second Edition of *Social Policy and Social Change* is a timely examination of the field, unique in its inclusion of both a historical analysis of problems and policy and an exploration of how capitalism and the market economy have contributed to them. The New Edition of this seminal text examines issues of discrimination, health care, housing, income, and child welfare and considers the policies that strive to improve them. With a focus on how domestic social policies can be transformed to promote social justice for all groups, Jimenez et al. consider the impact of globalization in the United States while addressing developing concerns now emerging in the global village.

In 2013, New York City launched a public education campaign with posters of frowning or crying children saying such things as "I'm twice as likely not to graduate high school because you had me as a teen" and "Honestly, Mom, chances are he won't stay with you." Campaigns like this support a public narrative that portrays teen mothers as threatening the moral order, bankrupting state coffers, and causing high rates of poverty, incarceration, and school dropout. These efforts demonize teen mothers but tell us nothing about their lives before they became pregnant. In this myth-shattering book, the authors tell the life stories of 108 brown, white, and black teen mothers, exposing the problems in their lives often overlooked in pregnancy prevention campaigns. Some stories are tragic and painful, marked by sexual abuse, partner violence, and school failure. Others depict "girl next door" characters whose unintended pregnancies lay bare insidious gender disparities. Offering a fresh perspective on the links between teen births and social inequalities, this book demonstrates how the intersecting hierarchies of gender, race, and class shape the biographies of young mothers.

A provocative meditation on race, Claudia Rankine's long-awaited follow up to her groundbreaking book *Don't Let Me Be Lonely: An American Lyric*. Claudia Rankine's bold new book recounts mounting racial aggressions in ongoing encounters in twenty-first-century daily life and in the media. Some of these encounters are slights, seeming slips of the tongue, and some are intentional offensives in the classroom, at the supermarket, at home, on the tennis court with Serena Williams and the soccer field with Zinedine Zidane, online, on TV-everywhere, all the time. The accumulative stresses come to bear on a person's ability to speak, perform, and stay alive. Our addressability is tied to the state of our belonging, Rankine argues, as are our assumptions and expectations of citizenship. In essay, image, and poetry, *Citizen* is a powerful testament to the individual and collective effects of racism in our contemporary, often named "post-race" society.

AN INSTANT NEW YORK TIMES BESTSELLER The "lively" (The New Yorker), "convincing" (Forbes), and "riveting pick-me-up we all need right now" (People) that proves humanity thrives in a crisis and that our innate kindness and cooperation have been the greatest factors in our long-term success as a species. If there is one belief that has united the left and the right, psychologists and philosophers, ancient thinkers and modern ones, it is the tacit assumption that humans are bad. It's a notion that drives newspaper headlines and guides the laws that shape our lives. From Machiavelli to Hobbes, Freud to Pinker, the roots of this belief have sunk deep into Western thought. Human beings, we're taught, are by nature selfish and governed primarily by self-interest. But what if it isn't true? International bestseller Rutger Bregman provides new perspective on the past 200,000 years of human history, setting out to prove that we are hardwired for kindness, geared toward cooperation rather than competition, and more inclined to trust rather than distrust one another. In fact this instinct has a firm evolutionary basis going back to the beginning of Homo sapiens. From the real-life Lord of the Flies to the solidarity in the aftermath of the Blitz, the hidden flaws in the Stanford prison experiment to the true story of twin brothers on opposite sides who helped Mandela end apartheid, Bregman shows us that believing in human generosity and collaboration isn't merely optimistic—it's realistic. Moreover, it has huge implications for how society functions. When we think the worst of people, it brings out the worst in our politics and economics. But if we believe in the reality of humanity's kindness and altruism, it will form the foundation for achieving true change in society, a case that Bregman makes convincingly with his signature wit, refreshing frankness, and memorable storytelling. "The Sapiens of 2020." —The Guardian "Humankind made me see humanity from a fresh perspective." —Yuval Noah Harari, author of the #1 bestseller *Sapiens* Longlisted for the 2021 Andrew Carnegie Medal for Excellence in Nonfiction One of the Washington Post's 50 Notable Nonfiction Works in 2020

Broken Three Times is a narrative nonfiction book that chronicles one family's travails through the child welfare system. While this is the story of one family, it typifies countless others who get lost in the system. Each chapter of the family's story provides a launching point for discussing contemporary policy and practice, while it presents scientific updates relevant for understanding risk and promoting resilience in maltreated children, and improving the child welfare system. Emerging insights from genetics and neuroscience research are also reviewed. The book begins with snapshots from the mother's abusive childhood, which sets the stage for discussing trauma-informed systems of care initiatives. These

programs include efforts to train professionals on the effects of trauma, implement universal screening of trauma experiences, and disseminate evidence-based treatments to address trauma-related psychiatric problems. The book then fast-forwards to the family's first involvement with Connecticut protective services when the children are eleven and ten. After a brief investigation, the family's case is closed, and despite their many needs, the family is not provided links to any ongoing supportive services. This chapter is then followed by a brief discussion of differential response programs. Like many unconfirmed cases, the family is re-referred to protective services within months of the initial case closing, and after a lengthy second investigation, the children are removed from their mother's care. Over the next five years we see the children pass through nearly twenty placements, while their mother continually relapses on crack and moves from one violent relationship to the next. The prevalence of substance abuse and domestic violence problems in families referred to protective services are also reviewed, together with a range of other issues relevant to improving the child welfare system and the outcomes of the children it serves. Over the course of the decade that is covered in the book's primary narrative, the child welfare system has started a process of significant reform. Trauma-informed systems of care, differential response teams, and strengthening of community-based mental health and addiction services are just a few trends that have begun to transform the system and improve the trajectory of children entering care in many jurisdictions. Judgment is still out on whether these changes will last and will prove effective, but stories like the one that forms the heart of *Broken Three Times* us of the complexity of the issues involved with child welfare. This book will hopefully provide readers with some ideas about concrete steps to take to improve practice, gaps in our knowledge, and a deepening appreciation of the value of incorporating broad perspectives into this work - from neurobiology to social policy.

The book examines how hegemonic development ideas and practices emerged in the context of the changing world order post-1945 and how this transformation was characterized by neoliberalism and securitization of development and security. Sahle also explores the rise of China and the start of Obama's presidency.

Ownership is on most people's lips these days, or at least the lack of ownership. Everywhere people seem to be fighting over what is theirs. They want to take back their property, their lands, their liberty, their bodies, their identity, and their right to do what they want. These demands are quite

remarkable when you consider that ownership is not an observable property but rather an abstract concept. And yet this abstract concept controls just about everything we do, and rarely do we stop to consider how it rules our lives. Ownership even explains the anger and political turmoil that is currently sweeping over Western democracies: people feel they have had something taken away, something they used to own in the past and want back. *Possessed* is the first accessible book to consider the psychological origins and future of ownership in a rapidly changing world. It reveals how we are compelled to accumulate possessions in a relentless drive to seek status and approval by signalling our values to others by what we own. It traces the history of ownership but looks to the future as our drive to own will need to adapt to environmental and technological change.

An elderly caretaker at a large outdoor exhibition, called Art in Nature, finds that a couple have lingered on to bicker about the value of a picture; he has a surprising suggestion that will resolve both their row and his own ambivalence about the art market. A draughtsman's obsession with drawing locomotives provides a dark twist to a love story. A cartoonist takes over the work of a colleague who has suffered a nervous breakdown only to discover that his own sanity is in danger. In these witty, sharp, often disquieting stories, Tove Jansson reveals the fault-lines in our relationship with art, both as artists and as consumers. Obsession, ambition, and the discouragement of critics are all brought into focus in these wise and cautionary tales.

"[A] landmark book . . . Solnit illustrates how the uprisings that begin on the streets can upend the status quo and topple authoritarian regimes" (Vice). A book as powerful and influential as Rebecca Solnit's *Men Explain Things to Me*, her *Hope in the Dark* was written to counter the despair of activists at a moment when they were focused on their losses and had turned their back to the victories behind them—and the unimaginable changes soon to come. In it, she makes a radical case for hope as a commitment to act in a world whose future remains uncertain and unknowable. Drawing on her decades of activism and a wide reading of environmental, cultural, and political history, Solnit argues that radicals have a long, neglected history of transformative victories, that the positive consequences of our acts are not always immediately seen, directly knowable, or even

measurable, and that pessimism and despair rest on an unwarranted confidence about what is going to happen next. Now, with a moving new introduction explaining how the book came about and a new afterword that helps teach us how to hope and act in our unnerving world, she brings a new illumination to the darkness of our times in an unforgettable new edition of this classic book. The Finnish-Swedish writer and artist Tove Jansson achieved worldwide fame as the creator of the Moomin stories, written between 1945 and 1970 and still in print in more than twenty languages. However, the Moomins were only a part of her prodigious output. Already admired in Nordic art circles as a painter, cartoonist and illustrator, she would go on to write a series of classic novels and short stories. She remains Scandinavia's best loved author. Tove Jansson's work reflected the tenets of her life: her love of family (and special bond with her mother), of nature, and her insistence on freedom to pursue her art. Love and work was the motto she chose for herself and her approach to both was joyful and uncompromising. If her relationships with men foundered on her ambivalence towards marriage, those with women came as a revelation, especially the love and companionship she found with her long-time partner, the artist Tuulikki Pietilä, with whom she lived on the solitary island of Klovharu. In this meticulously researched, authorised biography, Boel Westin draws together the many threads of Jansson's life: from the studies interrupted to help her family; the dark shades of war and her emergence as an artist with a studio of her own; to the years of Moomin-mania, and later novel writing. Based on numerous conversations with Tove, and unprecedented access to her journals, letters and personal archives, *Tove Jansson: Life, Art, Words* offers a rare and privileged insight into the world of a writer whom Philip Pullman described, simply, as 'a genius'.
