God Attachment Springer Nature

The Journal of Global Business and Management Research (GBMR) strives to comply with highest research standards and scientific/research/practice journals' qualities. Being international and interdisciplinary in scope, GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe.

The Apple Grower Routledge

Argues for an interactionist approach to spatial development that incorporates and integrates essential insights of the Piaget, Nativist, and Vygotskian approaches.

Aristotle's Concept of Chance Litres

For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly, by applying the intuitive knowledge of our great-grandparents with the fruits of modern scientific research and innovation. Since *The Apple Grower* first appeared in 1998, orchardist Michael Phillips has continued his research with apples, which have been called "organic's final frontier." In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting-edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers, as well as its limitations Creating a diverse, healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms How to make a small apple business viable by focusing on heritage and regional varieties, value-added products, and the "community orchard" model The author's personal voice and clear-eyed advice have already made *The Apple Grower* a classic among small-scale growers and home orchardists. In fact, anyone serious about succeeding with apples needs to have this updated edition on their bookshelf.

Making Space MIT Press

Ежедневная общенациональная деловая газета.российская ежедневная общественно-политическая газета с усиленным деловым блоком. Выпускается Издательским домом «Коммерсантъ». Периодичность – шесть раз в неделю (с понедельника по субботу).

Reasonable Compensation Springer Nature

The New News Reports of the death of the news media are highly premature, though you wouldn't know it from the media's own headlines. Ken Doctor goes far beyond those headlines, taking an authoritative look at the fast-emerging future. The Twelve Laws of Newsonomics reveal the kinds of news that readers will get and that journalists (and citizens) will produce as we enter the first truly digital news decade. A new Digital Dozen, global powerhouses from The New York Times, News Corp, and CNN to NBC, the BBC, and NPR will dominate news across the globe, Locally, a colorful assortment of emerging news players, from Boston to San Diego, are rewriting the rules of city

reporting, Newsonomics provides a new sense of the news we'll get on paper, on screen, on the phone, by blog, by podcast, and via Facebook and Twitter. It also offers a new way to understand the why and how of the changes, and where the Googles, Yahoos and Microsofts fit in. Newsonomics pays special attention to media and journalism students in a chapter on the back-to-the-future skills they'll need, while marketing professionals get their own view of what the changes mean to them.

Rocznik Polskiego Towarzystwa Naukowego na Obczyźnie SAGE

The selection of papers reprinted here traces the development of syntax from structural linguistics through transformational linguistics to operator grammar. These three are not opposing views or independent assumptions about language. Rather, they are successive stages of investigation into the word combinations which constitute the sentences of a language in contrast to those which do not. Throughout, the goal has been to find the systematicities of these combinations, and then to obtain each sentence in a uniform way from its parts. In structural analysis, the parts were words (simple or complex, belonging to particular classes) or particular sequences of these. In transformational analysis, it is found that the parts of a sentence are elementary sentences, whose parts in turn are simple words of particular classes. The relation between these two analyses is seen in the existence of an intermediate stage between the two, presented in paper 4, From Morpheme to Utterance. A further intermediate stage is presented in the writer's String Analysis of Sentence Structure, Papers on Formal Linguistics I, Mouton, The Hague 1962 (though it was developed after transformations, as a syntactic representation for computational analysis). Generalization of both of these analyses leads to operator grammar, in which each sentence is derived in a uniform way as a partial ordering of the originally simple words which enter into it: Each step (least upper bound) of the partial ordering (of a word requiring another) forms a sentence which is a component of the sentence being analyzed.

The Man Who Sold the World Harvard Business Press

This book presents a broad view of the ecology and behavior of aquatic insects, raising awareness of this conspicuous and yet little known fauna that inhabits inland waterbodies such as rivers, lakes and streams, and is particularly abundant and diverse in tropical ecosystems. The chapters address topics such as distribution, dispersal, territoriality, mating behavior, parental care and the role of sensory systems in the response to external and internal cues. In the context of ecology, it discusses aquatic insects as bio indicators that may be used to assess environmental disturbances, either in protected or urban areas, and provides insights into how genetic connectivity can support the development of novel conservation strategies. It also explores how aquatic insects can inspire solutions for various problems faced by modern society, presenting examples in the fields of material science, optics, sensorics and robotics.

American Bar Association

The use of trusts, both revocable and irrevocable, is growing, and it is increasingly important for the trustee to prudently invest the trust's assets. The Madoff scandal and legislative developments have highlighted the importance of that duty. Written with the individual trustee in mind - lawyers, individuals acting as trustees, financial planners, and accountants - this book examines the law of

diversification, investment directions, determining breach and damages, and provides guidelines for drafting an investment plan.

Deadpool's Secret Wars Springer

This landmark book is the first to provide a comprehensive account of Aristotle's concept of chance. Chance is invoked by many to explain order in the universe, the origins of life, even human freedom and happiness. An understanding of Aristotle's concept of chance is indispensable for an appreciation of his views on nature and ethics, views which have had a tremendous influence on the development of Western philosophy. Author John Dudley analyzes Aristotle's account of chance in the Physics, the Metaphysics, in his biological and ethical treatises, and in a number of his other works as well. Important complementary considerations such as Aristotle's criticism of Presocratic philosophers, particularly Empedocles and Democritus, Plato's concept of chance, the chronology of Aristotle's works, and the relevance of Aristotle's work to evolution and quantum theory are also covered in depth. This is an essential book for scholars and students of Western philosophy.

Global Management Universidad de los Andes

An intriguing examination of the extraordinary—and little known meeting between St. Francis of Assisi and Islamic leader Sultan Malik Al-Kamil that has strong resonance in today's divided world. For many of us, St. Francis of Assisi is known as a poor monk and a lover of animals. However, these images are sadly incomplete, because they ignore an equally important and more challenging aspect of his life -- his unwavering commitment to seeking peace. In *The Saint and the Sultan*, Paul Moses recovers Francis' s message of peace through the largely forgotten story of his daring mission to end the crusades. In 1219, as the Fifth Crusade was being fought, Francis crossed enemy lines to gain an audience with Malik al-Kamil, the Sultan of Egypt. The two talked of war and peace and faith and when Francis returned home, he proposed that his Order of the Friars Minor live peaceably among the followers of Islam—a revolutionary call at a moment when Christendom pinned its hopes for converting Muslims on the battlefield. The Saint and the Sultan captures the lives of St. Francis and Sultan al-Kamil and illuminates the political intrigue and religious fervor of their time. In the process, it reveals a startlingly timely story of interfaith conflict, war, and the search for peace. More than simply a dramatic adventure, though it does not lack for colorful saints and sinners, loyalty and betrayal, and thrilling Crusade narrative, *The Saint and the Sultan* brings to life an episode of deep relevance for all who seek to find peace between the West and the Islamic world. Winner of the 2010 Catholic Press Association Book Award for History

The Law of Trustee Investments Rocznik Polskiego Towarzystwa Naukowego na Obczyźnie Daily Graphic

One of the greatest challenges facing the food industry is providing safe food to an ever-increasing number of allergic consumers through a global supply chain. Approximately 2–4% of western adults and up to 10% of children are currently thought to be sensitive to food allergens, and the issue is of major commercial significance to food manufacturers. The market for 'free-from' foods has grown dramatically in recent years and the demand for gluten- and dairy-free foods shows no sign of abating in the foreseeable future. This volume provides an overview of the safe management of food allergens, aiming to help all those with a vested interest in understanding how to protect consumer health through good manufacturing practice and clear labelling advice. It examines the risk

management systems and practices being adopted by the food industry to tackle the growing hypersensitivity of consumers to a range of food proteins. The various aspects of the subject are addressed from a range of perspectives including that of researcher, food manufacturer, enforcement officer, clinician and consumer. There will be an emphasis on the scientific analysis of food and environmental samples and their use in verifying in-process controls and finished-product labelling claims. The book is directed at food scientists and technologists based in industry and research, quality assurance personnel, clinicians and public health officials.

Displacement, Language Maintenance and Identity Springer Science & Business Media

Winner of the James A. Duke Award for Excellence in Botanical Literature Award from the American Botanical Council. Compiled by the American Herbal Pharmacopoeia, this volume addresses the lack of authoritative microscopic descriptions of those medicinal plant species currently in trade. It includes an atlas providing detailed text and graphic descriptions.

Working Capital Oxford University Press, USA

Looks at the social implications of having constant access to others through cell phones, wireless computers, and other electronic devices.

Medicinal Plants in China Litres

This book re-examines management theory 'after Globalization'. Combining key names and studies from across the world, it explores the local realities that resist universal theories and that permeate the daily lives of practising managers. The book provides a comprehensive and critical reflection on the widely documented phenomenon of globalization in business. It assesses the implications of the diversity of individual economies and enterprises for general theories of management and concludes by presenting new approaches to the study and research of management and organizations.

Price on Contemporary Estate Planning (2022) CRC Press

This monograph presents an ecological perspective to the study of language maintenance and shift in immigrant contexts. The ecology incorporates past, present and future and treats spatial and temporal dimensions as the main organizing frames in which everyday language use and identity development can be explored. The methods combine a quantitative domain-based sociolinguistic survey with discourse analytic approaches. The novel approach is valuable for fellow researchers working in interdisciplinary fields of language maintenance, language shift, multilingualism and language planning in migration contexts. The ecological perspective adds to sociolinguistic theories of globalization and responds to current dynamics of translocality in modern immigrant contexts. The research presents language use and language planning efforts in the Sudanese community of Australia. Language, culture, race and ethnic identity are explored in unique

sociolinguistic contexts using an emic research lens and giving voice to the participants.

Readings in Planning Theory MIT Press

This introductory level textbook critically reviews and analyses the key themes underpinning knowledge management in organisations. It presents the key debates in this area, including coverage of epistemologies of knowledge, managing and sharing knowledge, and learning and innovation.

Portable Communities World Health Organization

Este libro surge en un contexto de circunstancias cambiantes, en el que temas de preocupación colectiva como los desplazamientos humanos globales, las catástrofes climáticas, las enfermedades que se transmiten a velocidades pasmosas, la digitalización y automatización de las guerras y los políticos agresivamente nacionalistas afectan a varios países desde hace décadas. La experiencia de la pandemia reverbera con variada intensidad en las páginas de Conocimientos, sociedades y tecnologías en América Latina, que fue escrito durante estos meses de cuarentenas inacabables en ciudades de América Latina y Europa. En esta obra hay temas actuales, urgentes, que ofrecen interpretaciones y reflexiones valiosas surgidas de la conciencia de lo que implica la ubicación en el Sur global para su discusión. Esta es una oportuna contribución al campo de los estudios sobre ciencia y tecnología desde una perspectiva regional y en un momento particular de nuestra historia.

Artificial Intelligence as a Disruptive Technology John Wiley & Sons

Catalogues the 150 species of medicinal plants most commonly used in traditional Chinese medicine. The book, which was compiled in collaboration with the Institute of Chinese Materia Medica, was produced in an effort to communicate knowledge about herbal medicine that has accumulated over thousands of years, has been confirmed through both empirical experience and scientific evaluation, and yet has rarely been published outside the Chinese literature. The book also responds to increasing respect for the value of medicinal plants as a source of efficacious and inexpensive new drugs that offer an important alternative to chemically synthesized medicines. Each plant species is first documented by a full colour photograph taken under natural conditions during the flowering or fruiting season. Where relevant, a second photograph illustrates the plant parts from which the crude drug is extracted. Explanatory notes for each species cover botanical name and synonyms, Chinese name, English name, parts used, description of the plant, its habitat, and geographical distribution, and clinical indications and dosage. Some of the syndromes and clinical signs are described in traditional Chinese medical terminology. Information on indications and dosage is in keeping with theories for the prescription of medicinal plants taken from traditional Chinese pharmacology. To facilitate retrieval of information, plant species are indexed according to botanical names, English names, names in Chinese phonetic alphabet, and Chinese (Han) characters. The book, which was compiled for reference and educational purposes, includes a note advising readers of the dangers of self-treatment.
