Give up while you're ahead, ol' boy. She doesn't want you. Then he remembered the passion of her kiss, the taste of her mouth, the scent of her hair, the feel of her skin beneath his hands, and he knew he wasn't about to give up. While serving his country, Trevor Rule experienced the wrenching heartache of losing his best friend in a brutal attack.

His grief is coupled with guilt when he falls in love with that friend's wife by reading letters she'd written to her husband. Kyla gave birth the same day she learned that her husband had been killed in a terrorist assault on Marine barracks. That was almost two years ago. Now, Kyla is struggling to rear her son alone...and wrestling with the longing generated by the handsome stranger who fortuitously enters their lives. Except Trevor's entrance into Kyla's life isn't accidental. He has sought her out not only because he feels he owes her and her child a debt he can

never repay, but also because he remembers the impassioned words she wrote to her husband. Which Trevor took to heart. Will her growing love be strong enough to forgive his deception?

For some time the Expert Group on Climate Obligations of Enterprises has been working on a revised version of the 'Principles on Climate Obligations of Enterprises'. The reasons for this updated version are the IPCC Special Reports of 2018 and 2019, an increasing number of unprecedented natural catastrophes, new climate cases, reports, academic publications and the growing awareness that the window of time is closing.00First published in 2017, the 'Principles on Climate Obligations of Enterprises' aim to provide a legal basis for active investment management and engagement geared at stimulating enterprises to comply with their legal obligations. In this second edition, 19 Principles were added and existing principles were reconsidered, and if

useful, amended. An extensive commentary is provided which further explains the Principles and their legal underpinning.

America's criminal codes are so voluminous that they now bewilder not only the average citizen but also the average lawyer. Our courthouses are so clogged that there is no longer adequate time for trials. And our penitentiaries are overflowing with prisoners. In fact, America now has the highest per capita prison population in the world. This situation has many people wondering whether the American criminal justice system has become dysfunctional. A generation ago Harvard Law Professor Henry Hart Jr. published his classic article, "The Aims of the Criminal Law," which set forth certain fundamental principles concerning criminal justice. In this book, leading scholars, lawyers, and judges critically examine Hart's ideas, current legal trends, and whether the

"first principles" of American criminal law are falling by the wayside. Policymakers, academics, and citizens alike will enjoy this lively discussion on the nature of crime and punishment, and how the choices we make in formulating criminal laws can impact liberty, security, and justice.

 „S-a vorbit despre niscaiva bariere culturale care ar împiedica intrarea culturii române în mult mai performantul sistem occidental. Nimic mai fals... Nu

cred că asemenea bariere există. Nu în cultură. Bariera s-a fixat, mai rezistentă decât zidul Berlinului, altundeva: între omul de cultură valoros și autoritatea incompetentă. Absolvent de liceu și de facultate la seară, factorul decizional (sintagmă înfiorător de lemnoasă!) știe că el știe mai bine, așa cum îl conving și sutele de yesmeni cu nimic mai buni decât el. Dacă într-adevăr cineva împiedică promovarea culturii române peste hotare, noi suntem aceia. Mă rog, unii dintre noi: cei care cred că o coroană depusă în fugă la o statuie coclită valorează mai mult decât zece traduceri de scriitori contemporani difuzate în centrele de cultură ale Europei.” (Radu Pavel Gheo)

Women run wind tunnel experiments, direct air traffic, and fabricate airplanes. American women have been involved with flight from the beginning, but until 1940, most people believed women could not fly, that Amelia Earhart was an exception to the rule. World War II changed everything. "It is on the record that women can fly as well as men," stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became "Should women fly?" Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn,

the Air Force's first woman fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of flight attendants, air traffic controllers, and mechanics. *American Women and Flight since 1940* is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.
