Read by millions of students since it was first published in 1965, The Norton Reader is the bestselling collection of its kind.

An Introduction to American Politics

W. W. Norton

America is the leading narrative history because students love to read it. Additional coverage of immigration

enhances the timeliness of the narrative. New Chapter Opener videos, History Skills Tutorials, and Norton's adaptive learning tool, InQuizitive, help students develop history skills, engage with the reading, and come to class prepared. What hasn't changed? Our unmatched affordability. Choose from Full, Brief (15% shorter), or The Essential Learning Edition--featuring fewer chapters and additional pedagogy.

50 Essays from the First 50 Years

Macmillan Higher Education

Analyze, Understand, Appreciate Living with Art provides the tools to help students think critically about the visual

arts. Using a wealth of examples, the first half of the text examines the nature, vocabulary, and elements of art, offering a foundation for students to learn to analyze art effectively. The latter half sets out a brief but comprehensive history of art, leading students to understand art within the context of its time and place of origin. High quality images from a wide range of periods and cultures bring the art to life, and topical essays throughout the text foster critical thinking skills. Taken together, all of these elements help students to better appreciate art as a reflection of the human experience and to realize that living with art is living with ourselves.

Read Until You Understand: The Profound Wisdom of Black Life and Literature American Roots

The Norton Reader An Anthology of Nonfiction W. W. Norton

The Norton Anthology of American Literature W. W. Norton

The Prentice Hall Guide for College Writers is organized around a sequence of purposes for writing. Each well-structured chapter contains process-oriented advice on choosing a subject, collecting data, drafting and revising essays for each purpose, and advice on customizing major rhetorical strategies to each purpose. Effective student examples, professional essays, and journal exercises help introduce students to the writing process as it changes with each different purpose.

The Norton Reader Addison-Wesley

A captivating, surprising history of timekeeping and how it has shaped our

world. For thousands of years, people of all cultures have made and used clocks, from the city sundials of ancient Rome to the medieval water clocks of imperial China, hourglasses fomenting revolution in the Middle Ages, the Stock Exchange clock of Amsterdam in 1611, Enlightenment observatories in India, and the high-precision clocks circling the Earth on a fleet of GPS satellites that have been launched since 1978. Clocks have helped us navigate the world and build empires, and have even taken us to the brink of destruction. Elites have used them to wield power, make money, govern citizens, and control lives—and sometimes the people have used them to fight back. Through the stories of twelve clocks, *About Time* brings pivotal moments from the past vividly to life.

Historian and lifelong clock enthusiast David Rooney takes us from the unveiling of al-Jazari's castle clock in 1206, in present-day Turkey; to the Cape of Good Hope observatory at the southern tip of Africa, where nineteenth-century British government astronomers moved the gears of empire with a time ball and a gun; to the burial of a plutonium clock now sealed beneath a public park in Osaka, where it will keep time for 5,000 years. Rooney shows, through these artifacts, how time has been imagined, politicized, and weaponized over the centuries—and how it might bring peace. Ultimately, he writes, the technical history of horology is only the start of the story. A history of clocks is a history of civilization. *Sex, Language, and the Reinvention of*

Psychological Realism MIT Press

With iconic movies like *Who's Afraid of Virginia Woolf?*, *The Graduate*, and *Carnal Knowledge*, Mike Nichols was the most prominent American director during the cultural upheavals of the 1960s. *Mike Nichols: Sex, Language, and the Reinvention of Psychological Realism* argues that he overhauled the style of psychological realism, and, in doing so, continues to shape the legacies of Hollywood cinema. It also reveals that misreadings of his films were central to foundational debates at the emergence of Cinema Studies as a discipline, inviting new reflections on critical dogma. Focusing on Nichols' classic movies, as well as later films such as *Silkwood*, *The Birdcage*, and *Angels in America*, Kyle Stevens demonstrates

that Nichols' realism lies not in the plausibility of his characters but in their inherent mystery. By attending to the puzzling words and silences, breaths and laughter, that comprise these characters, Stevens uncovers new insights into the subversive potential of a range of cinematic elements, and reveals how Nichols' satirical oeuvre, and Hollywood itself, participated in several of the nation's most urgent social, political, and philosophical advances.

Looseleaf for Living with Art The Norton

Reader An Anthology of Nonfiction

In the many studies of games and young people's use of them, little has been written about an overall "ecology" of gaming, game design and play--mapping the ways that all the various elements,

from coding to social practices to aesthetics, coexist in the game world. This volume looks at games as systems in which young users participate, as gamers, producers, and learners. The Ecology of Games (edited by Rules of Play author Katie Salen) aims to expand upon and add nuance to the debate over the value of games--which so far has been vociferous but overly polemical and surprisingly shallow. Game play is credited with fostering new forms of social organization and new ways of thinking and interacting; the contributors work to situate this within a dynamic media ecology that has the participatory nature of gaming at its core. They look at the ways in which youth are empowered through their participation in the creation, uptake, and revision of

games; emergent gaming literacies, including modding, world-building, and learning how to navigate a complex system; and how games act as points of departure for other forms of knowledge, literacy, and social organization. Contributors Ian Bogost, Anna Everett, James Paul Gee, Mizuko Ito, Barry Joseph, Laurie McCarthy, Jane McGonigal, Cory Ondrejka, Amit Pitaru, Tom Satwicz, Kurt Squire, Reed Stevens, S. Craig Watkins Katie Salen is a game designer and interactive designer as well as Director of Graduate Studies in Design and Technology, Parsons School of Design. With Eric Zimmerman, she is the coauthor of Rules of Play (MIT Press, 2003) and coeditor of The Game Design Reader (MIT Press, 2005).

A spell of arctic weather. A mysterious death. The reading of a will. A boy with silver eyes. Strange tracks in the snow. Danny Hallow, the last known remnant of the Wildwood family, arrives at the crumbling estate of Gnomewood Home and tumbles into the tangled web of his ancestor's secrets. Can Danny survive the biting cold, adults who think he shouldn't exist, attacks by hordes of vicious little creatures, attempts to befriend the town's most notorious lunatic and the sixth grade? It's a lot to ask of one short, skinny, paler-than-snow 11-year-old boy whose only defenses are expert-level bully evasion skills and a relentless sense of humor...plus the potentially dangerous and disturbing

traits he may have inherited from his unusual family tree. This is Book One in a paranormal adventure series for readers ten and up. Described as Stranger Things meets the Spiderwick Chronicles, *The Goblin's Winter* contains elements of fantasy, science fiction, and horror that readers of all ages will enjoy. *Molly Ivins Can't Say That, Can She?* W. Norton

Emphasizing the relevance of politics and government in everyday life, *We the People* provides tools to help students think critically about American government and politics. The Sixth Edition has been carefully updated to reflect most recent developments, including the ongoing conflict in Iraq and the 2006 midterm elections. Complemented by a rich package of

multimedia tools for instructors and students, including a new video-clip DVD, *We the People* is now more pedagogically effective than ever.

America W. W. Norton

The best-selling storytelling approach with tools that develop history skills
Oxford University Press

The fight for the future of the city street between pedestrians, street railways, and promoters of the automobile between 1915 and 1930. Before the advent of the automobile, users of city streets were diverse and included children at play and pedestrians at large. By 1930, most streets were primarily a motor thoroughfares where children did not belong and where pedestrians were condemned as “jaywalkers.” In *Fighting Traffic*, Peter Norton argues that to

accommodate automobiles, the American city required not only a physical change but also a social one: before the city could be reconstructed for the sake of motorists, its streets had to be socially reconstructed as places where motorists belonged. It was not an evolution, he writes, but a bloody and sometimes violent revolution. Norton describes how street users struggled to define and redefine what streets were for. He examines developments in the crucial transitional years from the 1910s to the 1930s, uncovering a broad anti-automobile campaign that reviled motorists as “road hogs” or “speed demons” and cars as “juggernauts” or “death cars.” He considers the perspectives of all users—pedestrians, police (who had to become “traffic

cops”), street railways, downtown businesses, traffic engineers (who often saw cars as the problem, not the solution), and automobile promoters. He finds that pedestrians and parents campaigned in moral terms, fighting for “justice.” Cities and downtown businesses tried to regulate traffic in the name of “efficiency.” Automotive interest groups, meanwhile, legitimized their claim to the streets by invoking “freedom”—a rhetorical stance of particular power in the United States. Fighting Traffic offers a new look at both the origins of the automotive city in America and how social groups shape technological change.

The Craft of Research, Fourth

Edition W. W. Norton & Company

"This is a book that is full of things I have

never seen before, and full of new things to say about things I thought I knew well. It is a book about houses and about culture and about how each affects the other, and it must stand as one of the major works on the history of modern housing." - Paul Goldberger, The New York Times Book Review Long before Betty Friedan wrote about "the problem that had no name" in *The Feminine Mystique*, a group of American feminists whose leaders included Melusina Fay Peirce, Mary Livermore, and Charlotte Perkins Gilman campaigned against women's isolation in the home and confinement to domestic life as the basic cause of their unequal position in society. *The Grand Domestic Revolution* reveals the innovative plans and visionary strategies of these persistent

women, who developed the theory and practice of what Hayden calls "material feminism" in pursuit of economic independence and social equality. The material feminists' ambitious goals of socialized housework and child care meant revolutionizing the American home and creating community services. They raised fundamental questions about the relationship of men, women, and children in industrial society. Hayden analyzes the utopian and pragmatic sources of the feminists' programs for domestic reorganization and the conflicts over class, race, and gender they encountered. This history of a little-known intellectual tradition challenging patriarchal notions of "women's place" and "women's work" offers a new interpretation of the history

of American feminism and a new interpretation of the history of American housing and urban design. Hayden shows how the material feminists' political ideology led them to design physical space to create housewives' cooperatives, kitchenless houses, day-care centers, public kitchens, and community dining halls. In their insistence that women be paid for domestic labor, the material feminists won the support of many suffragists and of novelists such as Edward Bellamy and William Dean Howells, who helped popularize their cause. Ebenezer Howard, Rudolph Schindler, and Lewis Mumford were among the many progressive architects and planners who promoted the reorganization of housing and neighborhoods around the needs of

employed women. In reevaluating these early feminist plans for the environmental and economic transformation of American society and in recording the vigorous and many-sided arguments that evolved around the issues they raised, Hayden brings to light basic economic and spacial contradictions which outdated forms of housing and inadequate community services still create for American women and for their families.

The Dawn of the Motor Age in the American City Witchbone

An incomparable resource, an unmatched value

An Anthology of Nonfiction McGraw-Hill Companies

The best-selling storytelling approach with tools that develop history skills.

The Norton Introduction to Literature with 2016 MLA Update W. W. Norton
The Norton Introduction to Literature presents an engaging, balanced selection of literature to suit any course. Offering a thorough treatment of historical and critical context, the most comprehensive media package available, and a rich suite of tools to encourage close reading and thoughtful writing, the Shorter Twelfth Edition is unparalleled in its guidance of understanding, analyzing, and writing about literature.

From Crisis to Calling Vintage
Adapting the methods of the much admired and extremely successful composition anthology *Ways of Reading*, this brief reader offers eight substantial essays about visual culture (illustrated

with evocative photographs) along with demanding and innovative apparatus that engages students in conversations about the power of images.

America: A Narrative History Macmillan

A brilliant scholar imparts the lessons bequeathed by the Black community and its remarkable artists and thinkers. Farah Jasmine Griffin has taken to her heart the phrase "read until you understand," a line her father, who died when she was nine, wrote in a note to her. She has made it central to this book about love of the majestic power of words and love of the magnificence of Black life. Griffin has spent years rooted in the culture of Black genius and the legacy of books that her father left her. A beloved professor, she has devoted herself to passing these works and their wisdom on

to generations of students. Here, she shares a lifetime of discoveries: the ideas that inspired the stunning oratory of Frederick Douglass and Malcolm X, the soulful music of Marvin Gaye and Stevie Wonder, the daring literature of Phillis Wheatley and Toni Morrison, the inventive artistry of Romare Bearden, and many more. Exploring these works through such themes as justice, rage, self-determination, beauty, joy, and mercy allows her to move from her aunt's love of yellow roses to Gil Scott-Heron's "Winter in America." Griffin entwines memoir, history, and art while she keeps her finger on the pulse of the present, asking us to grapple with the continuing struggle for Black freedom and the ongoing project that is American democracy. She challenges us to reckon

with our commitment to all the nation's inhabitants and our responsibilities to all humanity.

An Introduction to Sociology Longman Publishing Group

Text and accompanying photographs present art theory, practices, and history from ancient Egypt through the early twenty-first century.

Fighting Traffic University of Chicago Press

With more than three-quarters of a million copies sold since its first publication, *The Craft of Research* has helped generations of researchers at every level—from first-year undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful

research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online

databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the skills of doing and reporting research are not just for elite students but for

everyone—this new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers.
