*When Music
Migrates*
Routledge
Against the
background of
an
increasingly
diverse British
society, this
book traces
the evolution
of British
identity in the
twentieth
century. It
raises
fundamental
questions
about who we
are as a
nation and

how we got
here, and
provides clues
as to the
direction the
prevailing
public
discourse on
British identity
is likely to
take in the
twenty-first
century.
Constructing
Brexit Britain
Routledge
This book
offers a major
exploration of
the social and
cultural
importance of
popular music
to
contemporary
celebrations of
Britishness.
Rather than
providing a

history of
popular music
or an
itemization of
indigenous
musical
qualities, it
exposes the
influential
cultural and
nationalist
rhetoric
around
popular music
and the
dissemination
of that
rhetoric in
various forms.
Since the
1960s,
popular music
has surpassed
literature to
become the
dominant
signifier of
modern British
culture and

identity. This position has been enforced in popular culture, literature, news and music media, political rhetoric -- and in much popular music itself, which has become increasingly self-conscious about the expectation that music both articulate and manifest the inherent values and identity of the modern nation. This study examines the implications of such practices and the various social

and cultural values they construct and enforce. It identifies two dominant, conflicting constructions around popular music: music as the voice of an indigenous English 'folk', and music as the voice of a re-emergent British Empire. These constructions are not only contradictory but also exclusive, prescribing a social and musical identity for the nation that ignores its greater creative,

national, and cultural diversity. This book is the first to offer a comprehensive critique of an extremely powerful discourse in England that today informs dominant formulations of English and British national identity, history, and culture. Culture Wars in British Literature Ashgate Publishing, Ltd. Intersectionality and decolonisation are prominent themes in contemporary

British crime fiction. Through an in-depth critical and contextual analysis of selected contemporary British crime fiction novels from the 1990s to 2018, this distinctive book examines representation of race, class, sexuality, and gender by John Harvey, Stella Duffy, M.Y. Alam, and Dorothy Koomson. It argues that contemporary British crime fiction is a field of	contestation where urgent cultural and social questions are debated and the politics of representation explored. A significant resource which will be valuable to researchers and scholars of the crime genre, as well as British literature, this book offers timely critical engagement with intersectionality and decolonisation and their representation in contemporary British crime fiction.	<u>Forced Marriage and 'Honour' Killings in Britain</u> Bloomsbury Publishing In contemporary history, a much-debated issue has been whether European nations have a common identity and what relevance the European Union has for a shared definition of Europeanness. The present book examines the link between historical conceptions of Europe and the
---	---	---

contestations over Turkey's compatibility with the European Union during the 2000s. Chinese-British Intermarriage Taylor & Francis During the past 100 years, British citizens' shared sense of identity has been shaped and reshaped by a combination of geo-political developments, demographic and migration trends, racial and cultural conflict and the advent of English language

globalisation. This book traces the evolution of our national identity. Contemporary British Identity Taylor & Francis This book represents a contribution to both border studies and short story studies. In today's world, there is ample evidence of the return of borders worldwide: as material reality, as a concept, and as a way of thinking. This collection of critical essays focuses on the ways in which

the contemporary British short story mirrors, questions and engages with border issues in national and individual life. At the same time, the concept of the border, as well as neighbouring notions of liminality and intersectionality, is used to illuminate the short story's unique aesthetic potential. The first section, "Geopolitics and Grievable Lives", includes chapters that address the various ways

in which contemporary stories engage with our newly bordered world and borders within contemporary Britain. The second section examines how British short stories engage with "Ethnicity and Liminal Identities", while the third, "Animal Encounters and Metamorphic Bodies", focuses on stories concerned with epistemological borders and borderlands of existence and identity.

Taken together, the chapters in this volume demonstrate the varied and complex ways in which British short stories in the twenty-first century engage with the concept of the border. *English Nationalism* Cambridge Scholars Publishing Victorian Britain, at the head of the vast British Empire, was the wealthiest and most powerful country in the world. Yet, not all Britons were seen as

possessing the characteristics that defined what it actually meant to be 'British.' At the Margins of Victorian Britain focuses on the political means of policing unwanted 'others' in Victorian society: the Irish, Catholics and Jews, atheists, prostitutes and homosexuals. In this groundbreaking study, Dennis Grube details the laws and conventions that were

legally and culturally enforced in order to bar these 'others' from gaining power and influence in Victorian Britain. Utilizing a wide-ranging analysis, the book focuses on key case-studies: the anti-Semitism implicit in Lord Rothschild's barring from the House of Commons; the fine line between accepted male love and companionship and homosexuality, culminating in the Oscar Wilde trials of

the 1890s; and how laws against disease were used to police prostitutes and correct moral vices. Political and legal rhetoric, backed by the force of legislation, set the boundaries of 'Britishness', and enforced those boundaries through the 'majesty' of British law. As Jews, Roman Catholics and atheists were brought into a genuine sense of partnership in the British constitution by being allowed to

seek election to Parliament - homosexuals, prostitutes and the allegedly innately criminal Irish found themselves further and more vehemently displaced as the nineteenth century progressed. 'Otherness' stopped being a religious question and became instead a moral one. That fundamental shift marks the moment that 'Britishness' became a values-based

question. And we've been arguing about what those values are ever since. This will be essential reading for those working in the fields of Victorian studies, social and cultural history and constitutional identity. Edinburgh History of Scottish Literature: Modern Transformations: New Identities (from 1918) Bloomsbury Publishing England examines the state of

England's governance, identity and relationship with the other nations of the UK. It brings together academic experts on constitutional change, territorial politics, nationalism, political parties, public opinion, and local government both to explain the current place of England within a changing United Kingdom, and to consider how the "English constitution"

is likely to develop over the coming years. At a time when questions of territory and identity have grown increasingly politicised, Governing England offers a deeper academic analysis of how England and Englishness are changing. The central questions it addresses are whether, why, and with what consequences there has been a disentangling of England from Britain within the

institutions of the UK state, and of Englishness from Britishness at the level of culture and national identity. This volume includes competing interpretations of what has changed in terms of English nationhood. *Singular Continuities* BRILL
Feeling British argues that the discourse of sympathy both encourages and problematizes a sense of shared

national identity in eighteenth-century and Romantic British literature and culture. Although the 1707 Act of Union officially joined England and Scotland, government policy alone could not overcome centuries of feuding and ill will between these nations. Accordingly, the literary public sphere became a vital arena for the development and promotion of a new national identity, Britishness.

Feeling British starts by examining the political implications of the Scottish Enlightenment 's theorizations of sympathy the mechanism by which emotions are shared between people. From these philosophical beginnings, this study tracks how sympathetic discourse is deployed by a variety of authors - including Defoe, Smollett, Johnson, Wordsworth,

and Scott -
invested in
constructing,
but also in
questioning,
an inclusive
sense of what
it means to be
British.

resource for
students and
scholars of
media,
religion,
culture,
sociology, and

Islamic studies, and is also of benefit for journalists, media representatives, and activists looking to effect change for minority representation in the media industry specifically or in society at large. *Contemporary British Identity* Bucknell University Press. In almost a century since the First World War ended, Scotland has been transformed in many rich ways. Its literature has

been an essential part of that transformation. The third volume of the *History*, explores the vibrancy of modern Scottish literature in all its forms and languages. Giving full credit to writing in Gaelic and by the Scottish diaspora, it brings together the best contemporary critical insights from three continents. It provides an accessible and refreshing picture of both

the varieties of Scottish literatures and the kaleidoscopic versions of Scotland that mark literary developments since 1918. *The Making of English National Identity* Routledge. Englishness is an idea, a consciousness and a proto-nationalism. There is no English state within the United Kingdom, no English passport, Parliament or currency, nor any immediate prospect of

any. That does not mean that England lacks an identity, although English nationalism, or at least a distinctive nationalism, has been partly forced upon the English by the development in the British Isles of strident nationalisms that have contested Britishness, and with much success. So what is happening to the United Kingdom, and, within that, to England? Jeremy Black looks to the

past in order to understand the historical identity of England, and what it means for English nationalism today, in a post-Brexit world. The extent to which English nationalism has a "deep history" is a matter of controversy, although he seeks to demonstrate that it exists, from 'the Old English State' onwards, predating the Norman invasion. He also questions whether the standard modern

critique of politically partisan, or un-British, Englishness as "extreme" is merited? Indeed, is hostility to "England," whatever that is supposed to mean, the principal driver of resurgent English nationalism? The Brexit referendum of 2016 appeared to have cancelled out Scottish and other nationalisms as an issue, but, in practice, it made Englishness a

topic of particular interest and urgency, as set out in this short history of its origins and evolution. The Wiley Blackwell Companion to Contemporary British and Irish Literature Cambridge Scholars Publishing Against the background of an increasingly diverse British society, this book traces the evolution of British identity in the twentieth century. Debates exploring the nature of

Britishness and multiculturalism are here deconstructed through a linguistic lens, which considers the role played by the English language in shaping Britain's national identity. Within this context, two significant historical events are considered: the expansionism of nineteenth century British Empire, and the subsequent rise of the United States to the position

of world superpower. In charting the development of British nationhood over time, the book identifies three contrasting public narratives, each reflecting society's perceptions of the identity question at particular points in time: a discourse of laissez-faire at the turn of the century; a discourse of multiculturalism in the ensuing decades; and a discourse of integration during the

closing years. The book raises fundamental questions about who we are as a nation and how we got here. It also provides clues as to the direction the prevailing public discourse on British identity is likely to take in the twenty-first century.

Readings in Language and Identity

A&C Black
This edited collection studies the complex and multifaceted relations between

language and identity from a variety of theoretical perspectives. It brings together researchers from a range of fields to broach and shed light on crucial but tricky aspects of the relationships between language and identity. The contributors here employ different theoretical and methodological approaches to evince the discursive formations that emerge out of the encounters

and conjectures of language and identity and their manifestations in various theories and practices. As such, this collection will serve to inform and advance debates about 'language and identity' and their meanings in contemporary academic communities and cultural contexts. *The Idea of Englishness* Contemporary British Identity What is often held to be Britain's 'finest hour' -

the Second World War – was not experienced so uniformly across the British Isles. On the margins, the war was endured in profoundly different ways. While D-Day or Dunkirk is embedded in British collective memory, how many Britons can recall that Finns were interned on the Isle of Man, that enemy soldiers developed British infrastructure in Orkney, or

that British subjects were sent to concentration camps from Guernsey? Such experiences, tangential to the dominant British war narrative, are commemorated elsewhere in the 'other British Isles'. In this remarkable contribution to British Island Studies, Daniel Travers pursues these histories and their commemoration across numerous local sites of memory: museums, heritage sites

and public spaces. He examines the way these island identities assert their own distinctiveness over the British wartime story, and ultimately the way they fit into the ongoing discourse about how the memory of the Second World War has been constructed since 1945. British Cultural Identities Ashgate Publishing, Ltd. Immigration has long been associated

with the urban landscape, from accounts of inner-city racial tension and discrimination during the 1960s and 1970s and studies of minority communities of the 1980s and 1990s, to the increased focus on cities amongst contemporary scholars of migration and diaspora. Though cities have long provided the geographical frameworks within which a significant share of post-war migration has taken

place, Sarah Hackett argues that that there has long existed a rural dimension to Muslim integration in Britain. This book offers the first comprehensive study of Muslim migrant integration in rural Britain across the post-1960s period, examining the previously unexplored relationship between Muslim integration and rurality by using the county of Wiltshire in

the South West of England as a case study. Drawing upon a range of archival material and oral histories, it challenges the long-held assumption that local authorities in more rural areas have been inactive, and even disinterested, in devising and implementing migration, integration and diversity policies, and sheds light on smaller and more dispersed Muslim communities

that have traditionally been written out of Britain's immigration history. Stanford University Press The notion of the postcolonial metropolis has gained prominence in the last two decades both within and beyond postcolonial studies. Disciplines such as sociology and urban studies, however, have tended to focus on the economic inequalities, class disparities,

and other structural and formative aspects of the postcolonial metropolises that are specific to Western conceptions of the city at large. It is only recently that the depiction of postcolonial metropolises has been addressed in the writings of Suketu Mehta, Chris Abani, Amit Chaudhuri, Salman Rushdie, Aravind Adiga, Helon Habila, Sefi Atta, and Zakes Mda, among others. Most of these works probe

the urban specifics and physical and cultural topographies of postcolonial cities while highlighting their agential capacity to defy, appropriate, and abrogate the superimposition of theories of Western modernity and urbanism. These ASNEL Papers are all concerned with the idea of the postcolonial (in the) metropolis from various disciplinary viewpoints, as drawn from a great range of

cityscapes (spread out over five continents). The essays explore, on the one hand, ideas of spatial subdivision and inequality, political repression, social discrimination, economic exploitation, and cultural alienation, and, on the other, the possibility of transforming, reinventing and reconfiguring the 'postcolonial condition' in and through literary texts

and visual narratives. In this context, the volume covers a broad spectrum of theoretical and thematic approaches to postcolonial and metropolitan topographies and their depictions in writings from Australia and New Zealand, South Africa, South Asia, and greater Asia, as well as the UK, addressing issues such as modernity and market economies but also caste, class, and social and

linguistic aspects. At the same time, they reflect on the postcolonial metropolis and postcolonialism in the metropolis by concentrating on an urban imaginary which turns on notions of spatial subdivision and inequality, political repression, social discrimination, economic exploitation, and cultural alienation – as the continuing 'postcolonial' condition.
