### JAKOB KERR

Separation Process Engineering Includes Mass Transfer Analysis  
The Definitive, Fully Updated Guide to Separation Process  
Engineering—Now with a Thorough Introduction to Mass Transfer  
Analysis Separation Process Engineering, Third Edition, is the  
most comprehensive, accessible guide available on modern  
separation processes and the fundamentals of mass transfer.  
Phillip C. Wankat teaches each key concept through detailed,  
realistic examples using real data—including up-to-date simulation  
practice and new spreadsheet-based exercises. Wankat  
thoroughly covers each of today's leading approaches, including  
flash, column, and batch distillation; exact calculations and

shortcut methods for multicomponent distillation; staged and  
packed column design; absorption; stripping; and more. In this  
edition, he also presents the latest design methods for liquid-  
liquid extraction. This edition contains the most detailed coverage  
available of membrane separations and of sorption separations  
(adsorption, chromatography, and ion exchange). Updated with  
new techniques and references throughout, Separation Process  
Engineering, Third Edition, also contains more than 300 new  
homework problems, each tested in the author's Purdue  
University classes. Coverage includes Modular, up-to-date process  
simulation examples and homework problems, based on Aspen  
Plus and easily adaptable to any simulator Extensive new  
coverage of mass transfer and diffusion, including both Fickian  
and Maxwell-Stefan approaches Detailed discussions of liquid-

liquid extraction, including McCabe-Thiele, triangle and computer  
simulation analyses; mixer-settler design; Karr columns; and  
related mass transfer analyses Thorough introductions to  
adsorption, chromatography, and ion exchange—designed to  
prepare students for advanced work in these areas Complete  
coverage of membrane separations, including gas permeation,  
reverse osmosis, ultrafiltration, pervaporation, and key  
applications A full chapter on economics and energy conservation  
in distillation Excel spreadsheets offering additional practice with  
problems in distillation, diffusion, mass transfer, and membrane  
separation
