[Remaking the Italian Economy](#) Indiana University Press

This innovative book takes a comparative approach to the social origin-education-destination triangle (OED), looking at the intergenerational transmission of advantage in 14 countries. The intention is to debate the claim that education is the 'great social equalizer'. The contributors examine the relation between family background, education and occupational achievement over time and across educational levels, focusing on the relationship between individuals' social origins and their income and occupational outcomes. It will be of interest to academics and students of social policy and those interested in social inequalities and their reproduction over time.

Global Health Risk Framework W. W. Norton & Company

A classic picaresque epic detailing the thrilling exploits of Orlando, Morgante is a tale of war and of

the calamities that befall the romantic hero, his fellow knights, and their sovereign, Charlemagne. After encountering the fierce Morgante, Orlando converts the giant, who then becomes his squire and trusted companion. This annotated English translation will lead to a new appreciation of Luigi Pulci's singular epic masterpiece and contribute to a reassessment of the author's influence on modern English literature.

This edited volume examines the social networks of older people in nine countries from a range of perspectives in order to determine the potential of informal support structures to deliver the bulk of care in today's society. Researchers from the United States, Canada, England and Wales, France, Spain, the Netherlands, Sweden, Finland, and Israel present up-to-date analyses of support networks in each of their countries. The social policy implications of the comparative data are critically reviewed. The findings clearly suggest that social network availability is diminishing for a significant minority of elderly people. However, current practice in most countries reveals little purposive interweaving of formal services and informal networks, in order to strengthen the function of the latter and to prolong their presumed benefits.

Administrative and data- collection costs, individual responses to target interventions, and considerations of political economy make it difficult to establish workable procedures for fine targeting of spending to alleviate poverty. Self- targeting and targeting by indicators offer more advantages than other approaches.

Volume one of the complete wartime correspondence of the two great statesmen of the twentieth century This three-volume work is the first complete collection of the correspondence of Winston Churchill and Franklin D. Roosevelt. These volumes bring together every written communication that passed between Churchill and Roosevelt during their years of wartime leadership, providing rare perspective on the politics and strategy of the Second World War as conducted by two of history's most charismatic men. Few other world leaders have communicated so regularly and on such an informal and often personal level. The topics covered in their correspondence range from

the fate of nations and the shape of the postwar world to the mixing of martinis, details of fishing trips, and the swapping of doggerel verse. A major scholarly contribution, Churchill and Roosevelt: The Complete Correspondence draws on exhaustive research in American and British archives and include telegrams, letters, memos, and scrawled notes as well as transcripts made of Churchill and Roosevelt's telephone conversations and a number of message drafts and unsent cables that offer unique insights into the thinking of the two leaders. Warren Kimball provides invaluable commentaries throughout, giving the context of specific documents and providing a chronology of the period. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Since the 2014 Ebola outbreak many public- and private-sector leaders have seen a need for improved management of global public health emergencies. The effects of the Ebola epidemic go well beyond the three hardest-hit countries and beyond the health sector. Education, child protection, commerce, transportation, and human rights have all suffered. The consequences and lethality of Ebola have increased interest in coordinated global response to infectious threats, many of which could disrupt global health and commerce far more than the recent outbreak. In order to explore the potential for improving international management and response to outbreaks the National Academy of Medicine agreed to manage an international, independent, evidence-based, authoritative, multistakeholder expert commission. As part of this effort, the Institute of Medicine convened four workshops in summer of 2015 to inform the commission report. The

presentations and discussions from the Workshop on Research and Development of Medical Products are summarized in this report.

As outspoken in his day as Richard Dawkins or Christopher Hitchens are today, American freethinker and author ROBERT GREEN INGERSOLL (1833-1899) was a notorious radical whose uncompromising views on religion and slavery (they were bad, in his opinion), women's suffrage (a good idea, he believed), and other contentious matters of his era made him a wildly popular orator and critic of 19th-century American culture and public life. As a speaker dedicated to expanding intellectual horizons and celebrating the value of skepticism, Ingersoll spoke frequently on such topics as atheism, freedom from the pressures of conformity, and the lives of philosophers who espoused such concepts. This collection of his most famous speeches includes the lectures: ["The Gods" (1872) ["Humboldt" (1869) ["Thomas Paine" (1870) ["Individuality" (1873) ["Heretics and Heresies" (1874)

Social Policy in a Changing Europe Palgrave

On 14 February 2012, the European Commission presented its first Alert Mechanism Report (AMR), prepared in accordance with Article 3 of Regulation (EU) No 1176/2011 on the prevention and correction of macroeconomic imbalances. The AMR serves as an initial screening device, helping to identify Member States that warrant further in-depth analysis to determine whether imbalances exist or risk emerging. According to Article 5 of Regulation No. 1176/2011, these country-specific in-depth reviews should examine the nature, origin and severity of macroeconomic developments in the Member State concerned which constitute, or could lead to, imbalances. On the basis of this analysis, the Commission will establish whether it considers that an imbalance exists and what type of policy follow-up it will recommend to the Council. For Slovenia, the AMR noted that two indicators in the scoreboard exceeded their thresholds in 2010 and suggested the need to assess the development and drivers of potential imbalances. The AMR explained that in the years before the crisis, Slovenia enjoyed strong growth and domestic demand conditions, coupled with some losses in price competitiveness and a gradual widening of the current account deficit. It identified signs that overheating occurred, particularly as regards private sector credit growth, construction value added and property prices. The Slovenian economy was hit hard by the global crisis and the AMR noted that this has brought some, perhaps temporary, adjustment in the external balance but this is still at an early stage. Against this background, Section 2 examines the external and internal dimensions of imbalances including developments in competitiveness, private sector indebtedness and in asset markets. This is followed by a closer look at the implications of indebtedness of non-financial corporations for the banking sector in Section 3.

Section 4 presents possible policy considerations.

Keeping it in the Family Bastards of Pizzofalcone

Listen to a short interview with Risa Goluboff Host: Chris Gondek | Producer: Heron & Crane In this groundbreaking book, Risa L. Goluboff offers a provocative new account of the history of American civil rights law. The Supreme Court's decision in *Brown v. Board of Education* has long dominated that history. Since 1954, generations of judges, lawyers, and ordinary people have viewed civil rights as a project of breaking down formal legal barriers to integration, especially in the context of public education. Goluboff recovers a world before *Brown*, a world in which civil rights was legally, conceptually, and constitutionally up for grabs. Then, the petitions of black agricultural workers in the American South and industrial workers across the nation called for a civil rights law that would redress economic as well as legal inequalities. Lawyers in the new Civil Rights Section of the Department of Justice and in the NAACP took the workers' cases and viewed them as crucial to attacking Jim Crow. By the time NAACP lawyers set out on the path to *Brown*, however, they had eliminated workers' economic concerns from their litigation agenda. When the lawyers succeeded in *Brown*, they simultaneously marginalized the host of other harms--economic inequality chief among them--that afflicted the majority of African Americans during the mid-twentieth century. By uncovering the lost challenges workers and their lawyers launched against Jim Crow in the 1940s, Goluboff shows how *Brown* only partially fulfilled the promise of civil rights.
