Drop shipping is a retail fulfillment model that allows you to purchase products individually from a wholesaler and ship them directly to your customer. Instead of purchasing a large number of products, you simply go into partnership with a drop shipping supplier and list their merchandise for sale. Then, once you get a buyer/receive an order, you forward it to the supplier for fulfillment. The supplier will ship the product directly from their warehouse to your customer, and charge you only for the price of the shipped item (product). The drop shipping model has some number of advantages. Apart from being easy to start with low capital and low risks, locational flexibility coupled with wide range of product selection are also some of the reasons why drop shipping is a great business. However, one must be cautious of some factors to ensure a successful drop shipping business. Dealing with many customer and supplier errors which may affect delivery should be properly tackled. This book contains detailed information that can help you successfully run an e-commerce business. It will also teach you all you need to know about the drop shipping model, which will also help you run a successful e-commerce business. So take your time to read all the information in this book and try to use it as a guideline, most especially when you are new in the e-commerce world.

What is Dropshipping? Drop shipping simply refers to a retail fulfillment model where you do not stock the products you are selling. Instead of physically stocking the products you want to sell, you just display the items online (on your website mostly). Once a buyer places an order, you forward the order to the vendor who then acts as a third party and fulfills the orders on your behalf. From the above explanation, it is clear that the dropshipping business model usually depends of the

participation of three parties namely: Supplier The first in the chain is the dropshipping supplier who fulfills the orders placed by a customer. For instance, if you are selling shirts by H&M and a customer places an order for a shirt, you will send the order details to H&M and it, being the supplier, will fulfill the order. Retailer The retailer is the person/organization that acts as an intermediary who takes orders from the customer and forwards them to the supplier who then fulfills them. This order taking process can be through a website or a social media account. Customer The customer is the person who places the order through the website or social media account. Now that you know the parties involved in the dropshipping business model, let us examine a tad bit more on how the dropshipping model works.
