ESTES GILL

The SAGE Handbook of Criminological Theory OUP Oxford
Fifty years on from its original publication, HLA Hart's *The Concept of Law* is widely recognized as the most important work of legal philosophy published in the twentieth century, and remains the starting point for most students coming to the subject for the first time. In this third edition, Leslie Green provides a new introduction that sets the book in the context of subsequent developments in social and political philosophy, clarifying misunderstandings of Hart's project and highlighting central tensions and problems in the work.

Comparative Criminal Justice Routledge

The new edition of this bestselling textbook brings criminological research alive for students. It introduces the processes and practicalities of preparing, doing, experiencing and reflecting upon criminological research. The success of the First Edition has been its ability to contextualize research accessibly within real-life examples of crime, criminology and criminal justice—doing interviews with offenders in prison, undertaking evaluation on crime related projects, using questionnaires to measure fear. Its strength continues to lie in its ability to span the process of doing criminological research, helping students to understand the journey of the researcher.

Criminology Oxford University Press

There are enormous challenges in establishing policing systems in young democracies. Such societies typically have a host of unresolved pressing social, economic and political questions that impinge on policing and the prospects for reform. There are a series of hugely important questions arising in this context, to do with the emergence of the new security agenda, the problems of transnational crime and international terrorism, the rule of law and the role of the police, security services and the military. This is a field that is not only of growing academic interest but is now the focus of a very significant police reform 'industry'.

Development agencies and entrepreneurs are involved around the globe in attempts to establish democratic police reforms in

countries with little or no history of such activity. Consequently, there is a growing literature in this field, but as yet no single volume that brings together the central developments. This book gathers together scholars from political science, international relations and criminology to focus on the issues raised by policing within developing democracies examining countries in Eastern Europe, Asia, South America and Africa.

A Reader Criminology Comprehensive and accessible, Tim Newburn's bestselling *Criminology* provides an introduction to the fundamental themes, concepts, theories, methods and events that underpin the subject and form the basis for all undergraduate degree courses and modules in Criminology and Criminal Justice. This third edition includes: A new chapter on politics, reflecting the ever increasing coverage of political influence and decision making on criminology courses New and updated crime data and analysis of trends, plus new content on recent events such as the Volkswagen scandal, the latest developments on historic child abuse, as well as extended coverage throughout of the English riots A fully revised and updated companion website, including exam, review and multiple choice questions, a live Twitter feed from the author providing links to media and academic coverage of events related to the concepts covered in the book, together with links to a dedicated textbook Facebook page Fully updated to reflect recent developments in the field and extensively illustrated, this authoritative text, written by a leading criminologist and experienced lecturer, is essential reading for all students of Criminology and related fields. *Criminology* Originally published: Chicago: University of Chicago Press, 2014, as part of the *Fieldwork encounters and discoveries* series.

On the Run Oxford University Press, USA

This book reports the result of research carried out in a busy London police station on the role and impact of closed-circuit television (CCTV) in the management and surveillance of suspects - the most thorough example of the use of CCTV by the police in the world. It focuses on the use of CCTV in a very different environment to that in which its impact has previously been studied, and draws upon the analysis of CCTV footage, suspects' backgrounds and extensive interviewing of both police officers and suspects. The research is situated in the context of concerns

about the human rights implications of the use of CCTV, and challenges criminological and social theory in its conceptualisation of the role of their police, their governance and the use of CCTV. It raises key questions about both the future of policing and the treatment of suspects in custody. A key theme of this book is the need to move away from a narrow focus on the negative, intrusive face of surveillance: as this study demonstrates, CCTV has another 'face' - one that potentially watches and protects. Both 'faces' need to be examined and analysed simultaneously in order to understand the impact and implications of electronic surveillance.

International Human Rights Law SAGE

This succinct, tightly-written book offers a critical examination of the key issues facing policing in modern Britain. Those issues can be summarised in the following way: how is the apparently insatiable demand by the public for more policing and better protection to be satisfied, given the continued limits on public spending; that there is concern that what the public demands may not have a significant effect on crime levels; and that further extension of police powers and the reach of the law could themselves have unwanted consequences. All these questions are posed and answered on the basis of the wealth of research and operational evidence gathered by the police service itself, the Home Office, and independent researchers.

Handbook of Policing Routledge

Criminology is a booming discipline, yet one which can appear divided and fractious. In this rich and diverse collection of 34 essays, some of the world's leading criminologists respond to a series of questions designed to investigate the state, impact and future challenges of the discipline: What is criminology for? What is the impact of criminology? How should criminology be done? What are the key issues and debates in criminology today? What challenges does the discipline of criminology face? How has criminology as a discipline changed over the last few decades? The resulting essays identify a series of intellectual, methodological and ideological borders. Borders, in criminology as elsewhere, are policed, yet they are also frequently transgressed; criminologists can and do move across them to plunder, admire, or learn from other regions. While some

boundaries may be more difficult or dangerous to cross than others it is rare to find an entirely secluded locale or community. In traversing ideological, political, geographical and disciplinary borders, criminologists bring training, tools and concepts, as well as key texts to share with foreigners. From such exchanges, over time, borders may break down, shift, or spring up, enriching those who take the journey and those who are visited. It is, in other words, in criminology's capacity for and commitment to reflexivity, on which the strength of the field depends.

Crime and Criminal Justice Policy Routledge

Presenting a comprehensive single-volume collection of readings in criminology, this title provides students with convenient access to a broad range of excerpts from original criminological texts and key articles.

Crime and Security Routledge

Comprehensive and accessible, Tim Newburn's bestselling *Criminology* provides an introduction to the fundamental themes, concepts, theories, methods and events that underpin the subject and form the basis for all undergraduate degree courses and modules in Criminology and Criminal Justice. This third edition includes: A new chapter on politics, reflecting the ever increasing coverage of political influence and decision making on criminology courses New and updated crime data and analysis of trends, plus new content on recent events such as the Volkswagen scandal, the latest developments on historic child abuse, as well as extended coverage throughout of the English riots A fully revised and updated companion website, including exam, review and multiple choice questions, a live Twitter feed from the author providing links to media and academic coverage of events related to the concepts covered in the book, together with links to a dedicated textbook Facebook page Fully updated to reflect recent developments in the field and extensively illustrated, this authoritative text, written by a leading criminologist and experienced lecturer, is essential reading for all students of Criminology and related fields.

A Very Short Introduction Routledge

This book provides an empirically grounded, theoretically informed account of recent changes to the youth justice system in England and Wales, focusing on the introduction of elements of restorative justice into the heart of the criminal justice system, and the implementation of referral orders and youth offender

panels. Taken together, this amounts to the most radical overhaul of the youth justice system in the last half century, fundamentally changing the underlying values of the system away from an 'exclusionary punitive justice' and towards an 'inclusionary restorative justice'. The book explores the implications of these changes by using the lens of a detailed study of the implementation of referral orders and youth offender panels to explore wider issues about youth justice policy and the integration of restorative justice principles. It draws upon the findings of an in-depth study of the pilots established prior to the national rollout of referral orders in April 2002. The book will be essential reading not only for those involved in the task of implementing the new youth justice, but others with an interest in the criminal justice system and in restorative justice who need to know about the far reaching reforms to the youth justice system and their impact.

Plural Policing OUP Oxford

Previous edition, 1st, published in 1995 by Longman.

Bloomsbury Publishing

In this first major empirical study of its kind, the authors examine the growth of 'private' policing and its relationship with, and implications for, the public police service. Beginning with a critique of the sociology of policing, the authors then provide a detailed analysis of the concepts of public and private, and examine the boundaries between different forms of policing. Using data from the first ever survey of the private security sector in Britain, the authors provide estimates of the numbers of employees and firms in the industry; the range of services and products offered; and the attitudes of those at senior levels in private security organizations. Competing theoretical explanations for the growth of private policing are then considered. The book then examines policing at the local level. Using a case study of the London Borough of Wandsworth, the authors examine the range of individuals and organizations involved in policing on the ground. They describe and analyse the activities of the full range of 'policing' bodies, including the public police force, investigatory and regulatory agencies attached to national and local government, and private security organizations. Using this analysis, the authors offer a thorough reconceptualization of what is meant by 'policing' in the late modern era, and consider the implications of this for the public

police service and for the future of policing generally.

Enforcing Order McGraw-Hill Education (UK)

Written in a unique format, *Shades of Deviance* is a turbo-driven guide to crime and deviance, offering 56 politically engaged, thought-provoking and accessibly written accounts of a wide range of socially and legally prohibited acts. This book will be essential reading for undergraduate students in the fields of criminology and sociology and those preparing to embark on degree courses in these fields, as well as general readers. Written by field-leading experts from across the globe and designed for those who want a clear and exciting introduction to the complex areas of crime and deviance, this book provides a large number of short overviews of a wide range of social problems, harms and criminal acts. Offering a series of cutting-edge and critical treatments of issues such as war and murder, paedophilia, ecocide, human experimentation, stalking and sexting, this book also gives a guide to further readings and suggestions for other media to develop the reader's understanding of these issues. *Shades of Deviance* requires readers to critically reconsider their ideas about what is right and wrong, about what is socially harmful and which problems we should focus our attention on. It also provides careful analysis and reasoned explanation of complex issues in a world in which sensationalist headlines, anxiety and fear about crime permeate our lives - read it to be prepared!

Key Readings in Criminology SAGE Publications

The criminal justice system is wide ranging: it covers crimes, policing, the sentencing of offenders, and prisons. This title draws upon the latest research and current practices from around the world. Focusing on the adversarial model of justice found in common law countries such as the US, UK, Canada, and Australia, it discusses topics such as the uses of imprisonment, the effects of capital punishment, and the purposes of sentencing. Considering the role of the victim, as well as public knowledge and attitudes towards criminal justice, it assesses the way in which the system functions.

Handbook of Criminal Investigation Routledge

This book provides the most comprehensive and authoritative book yet published on the subject of criminal investigation, a rapidly developing area within the police and other law enforcement agencies, and an important sub discipline within

police studies. The subject is rarely out of the headlines, and there is widespread media interest in criminal investigation. Within the police rapid strides are being made in the direction of professionalizing the criminal investigation process, and it has been a particular focus as a means of improving police performance. A number of important reports have been published in the last few years, highlighting the importance of the criminal investigation process not only to the work of the police but to public confidence in this. Each of these reports has identified shortcomings in the way criminal investigations have been conducted, and has made recommendations for improvement. The Handbook of Criminal Investigation provides a rigorous and critical approach to not only the process of criminal investigation, but also the context in which this takes place, the theory underlying it, and the variety of factors which influence approaches to it. It will be an indispensable source of reference for anybody with an interest in, and needing to know about, criminal investigation. Contributors to the book are drawn from both practitioners in the field and academics.

Fugitive Life in an American City Willan Pub

What is it about crime that makes it 'men's work'? Can we imagine masculinity without crime? This is the first book of its

kind to bring contributors from three continents together to examine the relationship between masculinity and crime. Covering such areas as policing, prisons, violence against women, homicide, white-collar crime, and male victimisation, this book will force us to rethink many aspects of masculinity and crime.

Criminal Justice Routledge

Paul Knepper discusses the difference social policy makes, or can make, in any response to crime. He also considers the contribution of criminology to the debates on major social policy areas, such as housing, education, employment, health and family.

Criminology Routledge

This book brings together ten leading British criminologists to explore the contemporary politics of crime and its control. The volume is produced in honor of Britain's most important criminological scholar - David Downes of the London School of Economics. The essays are grouped around the three major themes that run through David Downes' work - sociological theory, crime and deviance; comparative penal policy; and, the politics of crime. The third theme also provides the overarching unifying thread for the volume. The contributions are broad

ranging and cover such subjects as criminological theory and the new East End of London, the practice of comparative criminology including an analysis of variations in penal cultures within the United States, restorative justice in Colombia, New Labor's politics and policy in relation to dangerous personality-disordered offenders, the legal construction of torture, and the future for a social democratic criminology.

The Making of Criminal Justice Policy SAGE Publications

Fully updated edition offers coverage of new topics and a more student-friendly design, while retaining the original style and features.

What is Criminology? Macmillan

This collection explores the intersection between criminology, conflict resolution and restorative justice. It traces the role of criminological discourses in the resolution of conflict at the macro political level (in South Africa and Northern Ireland) and the micro level in settings such as local communities, indigenous justice systems and in the youth justice system. The resulting discourse, drawing upon peacemaking criminology, human rights and restorative justice frameworks, suggests an important symbiosis between the traditionally distinct disciplines of criminology and conflict resolution peace studies.
